18ARC33

Third Semester B.Arch. Degree Examination, July/August 2022 Climatology

Time: 3 hrs. Max. Marks: 100

Note: 1. Answer any FIVE full questions, choosing ONE full question from each module.

2. Draw neat sketches, wherever necessary.

Module-1

- Explain how weather conditions are recorded in Weather station. (10 Marks) 1
 - Explain the concept of application of effective temperature in Climate design. (10 Marks)

- Why is the study of climate and its elements important in building design? (10 Marks) 2
 - What is Thermal Comfort? Explain the indices of Thermal Comfort. (10 Marks)

Module-2

- Explain the principle behind the making of Sun path diagram. (10 Marks) 3
 - Workout the critical relationship between Thermal balance of Thermal comfort of Human body, highlighting the body's heat exchange mechanisms. (10 Marks)

OR

Explain in brief the thermal and physical properties of the building materials of their effect on (20 Marks) indoor Environment.

Module-3

What is Thermal Insulation? Explain the various methods of roof and wall insulation with (20 Marks) sketches.

OR

- Elaborate on how each of the following help in Thermal Control in buildings:
 - a. Orientation

Special glass. b.

c. Cavity wall

Shading devices.

(20 Marks)

Module-4

- a. How can the incoming radiation through doors, windows and ventilators be controlled? (10 Marks)
 - b. Justify the requirements of Openings for Natural Ventilation in Buildings. (10 Marks)

OR

- Explain the various components of day light factors. (10 Marks) 8
 - Explain the factors to be considered for achieving Natural Ventilation in buildings.(10 Marks)

Module-5

Design a Single Bedroom House in warm humid climate. Explain the strategies to create (20 Marks) comfortable Environment in built space.

OR

Explain the design considerations in design of Hot dry settlement with an example. (20 Marks)
