

## Third Semester B.E. Degree Examination, June/July 2018 Discrete Mathematical Structures

Time: 3 hrs. Max. Marks:100

Note: Answer FIVE full questions, selecting at least TWO questions from each part.

## PART - A

- 1 a. Let U be the set of real numbers,  $A = \{x/x \text{ is a solution of } x^2 4 = 0\}$  and  $B = \{-1,4\}$  then compute
  - (i)  $\overline{A}$  (ii)  $\overline{B}$  (iii)  $\overline{A \cup B}$  (iv)  $\overline{A \cap B}$  (08 Marks)
  - b. Among 100 students in a class 32 study Maths, 20 study Physics, 45 study Biology, 7 study Maths and Physics, 10 study physics and Biology, 15 Study Maths and Biology, 30 do not study any one of. Then find
    - (i) The number of students studying all subjects.
    - (ii) The number of students studying exactly one subject. (08 Marks)
  - A fair coin is tossed 5 times. What is the probability that the number of heads always exceeds the number of tails as each outcome is observed.
- 2 a. There are two restaurants next to each other. One has the sign that says Good food is not cheap" and the other has a sign that says "cheap food is not good". Are the signs says same thing? If yes verify the answer.

  (06 Marks)
  - b. What is the difference between Tautology and Contingency? (02 Marks)
  - c. Verify the following without using truth table:  $[(p \rightarrow q) \land (\neg r \lor s) \land (p \lor r)] \therefore \neg q \rightarrow s$ .

d. Write the negation of the following statements:

- (i) If Rajiv is not sick, then if he goes to the picnic, then he will have a good time.
- (ii) Ajay will not win the game or he will not enter the contest. (08 Marks)
- 3 a. Let n be an integer. Prove that n is odd fand only if 7n+8 is odd. (08 Marks)
  - b. Prove that for all real numbers x and y<sub>x</sub> if  $x + y \ge 100$ , then  $x \ge 50$  or  $y \ge 50$ . (08 Marks)
  - c. For all positive real numbers x and  $\hat{y}$  if the product xy exceeds 25, then x > 5 or y > 5.

    (04 Marks)
- 4 a. Prove that for any positive integer n,

$$\sum_{i=1}^n \frac{F_{i-1}}{2^i} = 1 - \frac{F_{n+2}}{2^n}$$

By mathematical induction, where F<sub>n</sub> denote n<sup>th</sup> Fibonacci number. (08 Marks)

b. Consider an 8 × 8 Chessboard. I contains 64 1×1 squares and one 8×8 square. How many 2×2 square does it contains? How many 3×3 squares? How many squares in total?

(12 Marks)

- For each of the following functions, determine whether it is one-to-one and also determine 5 its range,
  - (i)  $f: z \rightarrow z$ ,  $f(x) = x^3 x$
  - (ii)  $f: R \rightarrow R$ ,  $f(x) = e^x$
  - (iii)  $f:[0,\pi] \rightarrow R$ ,  $f(x) = \sin x$

(06 Marks)

(06 Mark

- b. Prove that  $\sum_{K=0}^{n} (-1)^{K} {n \choose n-K} (n-K)^{m} = 0$  for n = 5 and m = 2, 3, 4
- c. Let f, g, h:  $z \rightarrow z$  be defined by f(x) = x 1, g(x) = 3x,  $h(x) = \begin{cases} 0, & x \text{ Even} \\ 1, & x \text{ Odd} \end{cases}$  then determine
  - (i)  $(f \circ g) \circ h$  (ii)  $g^3$

(08 Mark = 1

- Determine the number of relations on  $A = \{a, b, c, d, e\}$  that are 6
  - Antisymmetric (i)
- (ii) Irreflexive
- (iii) Reflexive

(iv) Niether reflexive nor irreflexive.

- (08 Mark -) (06 Mark -)
- b. Draw the Hasse diagram for all the positive integer division of 72.
- c. How many of the equivalence relations on A = {a, b, c, d, e, f} have
  - One equivalence class of size 4. (i)
    - At least one equivalence class with three or more elements? (ii)

(06 Mark ...

State and prove Lagranges theorem for finite group G.

- (96 Mark
- Let G be a group with subgroups H and K. If |G| = 660, |K| = 66 and  $K \subset H \subset G$ , then what (06 Marks) are the possible values for |H|?
- Define a cyclic group? Verify that  $(Z_5^*,*)$  is cyclic. Find a generator of this group.

(08 Mark s +

- Define addition and multiplication, denoted by 
  and respectively, on the set Q 8 follows. For a,  $b \in Q$ ,  $a \oplus b = a + b + 7$ ,  $a \odot b = a + b + (ab/7)$  then prove that  $(Q, \oplus, \odot)$  is (08 Marks) ring.
  - Prove that, a finite integral domain (D, +, \*) is a fild. b.

(06 Marks)

c. If 3 distinct integers are randomly selected from the set {1, 2, 3, ...., , 1000}. What is the (06 Marks) probability that their sum is divisible by 3?
