Eighth Semester B.E. Degree Examination, November 2020 Wireless Cellular and LTE 4G Broadband

Time: 3 hrs.

Max. Marks: 80

		Note: Answer any FIVE full questions irrespective of modules.
		Module-1
1	a.	With a neat block diagram, explain LTE network architecture and describe briefly the new
		elements provided in it. (08 Marks)
	b.	
		communication. (08 Marks)
2	a.	Explain the steps involved in developing a statistical model. Discuss any one type of model.
		(08 Marks)
	b.	Explain the techniques used for mitigating narrow band fading. (08 Marks)
		Module-2
3	а	With a neat diagram, explain the Orthogonal Frequency Division Multiplexing (OFDM)
Ü	٠.,	used in LTE. (08 Marks)
	b.	What is PAR problem? Explain the methods used for PAR reduction. (08 Marks)
4	a.	Explain the concept of Diversity gain and Array gain. (08 Marks)
	b.	Explain receive diversity combining algorithm. (08 Marks)
		Module 3

		<u>ivioquic-3</u>	
5	a.	Discuss the various design principles used in LTE specification.	(08 Marks)
	b.	Discuss the Radio Interface protocol layers of LTE.	(08 Marks)
6	a.	With a neat sketch, explain the frame structure used in LTE.	(08 Marks)
	b.	Discuss down link transport channel processing.	(08 Marks)

Module-4

	1.1044.5	
7	a. Discuss channel coding for up – link channel information.	(08 Marks)
	b. Briefly explain up – link reference signals and resource mapping of them.	(08 Marks)
	Allen	

Explain Channel Quality Indicator (CQI) feed back with the help of CQI estimation and (08 Marks) reporting modes. (08 Marks)

Discuss Random Access Procedures used in LTE.

Module-5

Discuss the main functions and services of PDCP sub layers for user plane and control (08 Marks) plane.

b. Explain the functions and services of RLC and MAC layers.

(08 Marks)

With a neat flow diagram, explain Mobility Management over X₂ interface. 10 (08 Marks) Discuss briefly methods used to mitigate Inter Cell Interference (ICI) in uplink and down (08 Marks) link.
