

PART I

1. Resources and Development of Power in India	1.1—1.94
1.1. Introduction. 1.2. Hydel Power Development. 1.3. Thermal Power Development. 1.4. Nuclear Power Development. 1.5. The Rule of NTPC and NHPC in National Power Development. 1.6. Power Development in Private Sector. 1.7. Enron Powr Plant in Maharashtra. 1.8. Present Power Position in India. 1.9. Future Planning in India. Recent Power Developments (1999-2001). 1.10. Present World Power Position and Future.	
2. Hydrology	2.1—2.32
2.1. Introduction. 2.2. Rainfall and its Measurement. 2.3. Run-off and its Measurement. 2.4. Hydrographs. 2.5. Flow Duration Curves. 2.6. Mass-Curves and Storage.	
3. Different Hydro-electric Power Plants	3.1—3.25
3.1. Introduction. 3.2. Site Selection for hydro-electric power plants. 3.3. Classification of hydro-electric power Plants. 3.4. Run-off River plants without pondage. 3.5. Run-off River plants with pondage. 3.6. Storage Reservoir plants. 3.7. Pump storage plants. 3.8. General Arrangement of an hydroelectric project and its operation. 3.9. Advantages of hydro-electric power plants.	
4. Design Construction and Operation of Different Components of Hydro-electric Power-stations	4.1—4.64
4.1. Reservoirs. 4.2. Dams. 4.3. Spillways and Control Gates. 4.4. Inlet and Outlet Works. 4.5. Water Tunnels. 4.6. Canals and Penstocks. 4.7. Water Hammer and Surge Tanks. 4.8. Power House and Turbine Setting. 4.9. Prime-movers. 4.10. Specific Speed of Turbines. 4.11. Draft Tubes. 4.12. Models and Model Testing. 4.13. Selection of Turbine. 4.14. Governing of Water Turbines. 4.15. Advantages of Hydro-electric Power Plants.	
PART II	
5. Introduction to Thermal Power Plant	5.1—5.16
5.1. Introduction. 5.2. General Layout of Modern Thermal Power Plant. 5.3. Working of Thermal Power Plant. 5.4. Site Selection for Thermal Power Plant. 5.5. Material Requirements of 100 MW Plant. 5.6. Development of Thermal Power in India and Future Developments. 5.7. Fossil Fuel Resources & Prospects of Thermal Power in India.	
6. Fuels, Properties & Their Storage	6.1—6.23
6.1. Introduction. 6.2. Coal a Major Source of Power in India and World. 6.3. Analysis of Coal. 6.4. Basic Coal Ingredients and Their Effects on Furnace Design. 6.5. Classification of Cal. 6.6. Coal Benefication. 6.7. Coal Blending or Mixing. 6.8. Coal Desulpha nization. 6.9. Indian Coals. 6.10. Selection of Coal for Thermal Power Plants. 6.11. Liquid Fuels. 6.12. Gaseous Fuels. 6.13. Coal Fines as Fuel. 6.14. Oil Shale and Tar Sands—New Fuel Sources. 6.15. Introduction to Slurry or Emulsion Type Fuels.	
7. Coal Handling, Storage, Preparation & Feeding	7.1—7.26
7.1. Introduction. 7.2. Out-plant Handling of Coal. 7.3. Storage of Coal at Plant Site. 7.4. Inplant Handling of Coal. 7.5. Coal Dust and Its Control. 7.6. Coal Crushing. 7.7. Coal Weighing Methods.	

<i>Chapters</i>	<i>Pages</i>
8. Burning of Fuels	8.1—8.18
8.1. Coal Burning Methods. 8.2. Overfeed Stokers. 8.3. Underfeed Stokers. 8.4. Pulverised Fuels and their Advantages. 8.5. Pulverised Fuel Burners. 8.6. Special Type Burners. 8.7. Burning of Coal Washery Waste.	
9. Ash Handling & Dust Collection	9.1—9.34
9.1. Introduction. 9.2. Ash Handling Systems. 9.3. Dust Collection and its Disposal. 9.4. Mechanical Dust Collectors (Dry Type) and Fabric Filters. 9.5. Electrostatic Precipitators (ESP). 9.6. Gas Conditioning. 9.7. Wet Type Mechanical Dust Collectors. 9.8. Combined Operation of Different Collectors. 9.9. Performance of Dust Collectors. 9.10. Installation of Collectors. 9.11. Ash Disposal. 9.12. Ash and its Effects on Boiler Operation and Performance. 9.13. Uses of Ash. 9.14. Utilisation of Fly Ash.	
10. Scrubber Technology	10.1—10.23
10.1. Introduction. 10.2. Non-regenerative or Throwaway Type Scrubbers. 10.3. Methods to Upgrade the Performance of Conventional Limestone FGD System. 10.4. Non-conventional Wet Scrubber. 10.5. Spray Dryers (Dry Scrubbers). 10.6. Different Types of Absorbers. 10.7. Sealing and Corrosion of Scrubbers and their Prevention. 10.8. Non-conventional Throwaway Scrubbers. 10.9. Advantages and Disadvantages of Wet Scrubbers. 10.10. Regenerative Type Scrubbers (FGD Systems). 10.11. Dry Scrubbing System. 10.12. Sludge Disposal and Its Uses.	
11. Control of Nitrogen Oxides	11.1—11.9
11.1. Introduction. 11.2. Effects of Nitrogen Oxides. 11.3. Factors affecting NO _x Formation. 11.4. Reducing NO _x by Furnace and Burner Design. 11.5. Reducing NO _x by Two-Stage Combustion. 11.6. Control of NO _x by Flue Gas Recirculation (FGR). 11.7. Exhaust Gas Denitrification. 11.8. Simultaneous Desulphurization and Denitrification. 11.9. Control of NO _x in Gas Turbine Plant.	
12. Draught System	12.1—12.13
12.1. Introduction. 12.2. Losses in the Air Gas Loop System and its Measurement. 12.3. Natural Draught and Design of Chimney. 12.4. Artificial Draught (Forced and Induced Draughts). 12.5. Forced Draught. 12.6. Induced Draught. 12.7. Comparison of Forced and Induced Draughts. 12.8. Balanced Draught. 12.9. Power Requirements for Draught Fans. 12.10. Fan Drives and Controls. 12.11. Design and Construction of Chimney.	
13. High Pressure Boilers	13.1—13.33
13.1. Introduction. 13.2. Advantages of High Pressure Boilers. 13.3. La Mont Boiler. 13.4. Benson Boiler. 13.5. Loeffler Boiler. 13.6. Schmidt-Hartmann Boiler. 13.7. Velox-Boiler. 13.8. Super-critical Boilers. 13.9. Supercharged Boilers 13.10. Flash Steam Generator. 13.11. Waste Heat Boiler. 13.12. Location of Heating Surfaces in Water Tube Boilers. 13.13. Furnace Wall Design. 13.14. Types of Furnaces. 13.15. Design Considerations for Modern Boilers. 13.16. Corrosion in Boilers and its Prevention. 13.17. Effects of Indian Coals on Boiler Performance. 13.18. Causes of Boiler Tube Failures and Prevention.	
14. Boiler Accessories	14.1—14.21
14.1 Introduction. 14.2 Economisers. 14.3 Air Preheaters. 14.4 Superheaters. 14.5 Soot Blowers.	

<i>Chapters</i>	<i>Pages</i>
15. Fluidized Bed Combustion Systems (FBC)	15.1—15.19
15.1. Introduction. 15.2. Principle of FBC. 15.3. Types of FBC. 15.4. Arrangements of Different FBC Plants. 15.5. FBC for Low Grade Fuels. 15.6. Corrosion of FBC System. 15.7. Control of FBC System. 15.8. Starting of Fluid-Bed Firing System. 15.9. Conversion of Oil Fired Boilers to FBC System. 15.10. Erosion and Corrosion and its Prevention in FBC Boilers. 15.11. Advantages of Fluidized Bed Systems.	
16. Steam Turbines	16.1—16.11
16.1. Classification of Turbines and their Working. 16.2. Compounding of Steam Turbines. 16.3. Advantages and Disadvantages of Velocity Compounding. 16.4. Losses in Steam Turbines. 16.5. Governing of Steam Turbines. 16.6. Lubrication System for Steam Turbines. 16.7. Turbine Troubles. 16.8. Blade Materials for Turbines. 16.9. Industrial Steam Turbines.	
17. Condensers	17.1—17.34
17.1. Introduction. 17.2. Elements of Steam Condensing Plant. 17.3. Advantages of Condenser. 17.4. Types of Steam Condensers. 17.5. Air Leakage, its Effects on the Performance of Condenser and Methods of its Removal. 17.6. Vacuum Efficiency. 17.7. Dalton's Law of Partial Pressure used for Condenser Analysis. 17.8. Thermodynamic Analysis of Condenser. 17.9. Design of Condenser. 17.10. Corrosion and Scale Formation in Condenser Tubes and their Prevention. 17.11. Materials for Steam Condensers.	
18. Cooling Ponds and Cooling Towers	18.1—18.40
18.1. Necessity of Cooling the Condenser Water. 18.2. Condenser Water Cooling System. 18.3. Water Cooling Methods and Mechanism of Cooling. 18.4. Introduction to Cooling Ponds. 18.5. Atmospheric Natural Draft Cooling Towers. 18.6. Mechanical Draft Cooling Towers. 18.7. Air-cooled or Dry Type Cooling System. 18.8. Indirect Dry Types or Heller Cooling System. 18.9. Dry-wet Combined Cooling Towers. 18.10. Water Distribution Systems in Cooling Towers. 18.11. Prevention of Carryover Losses and Fog Formation from Cooling Towers. 18.12. Performance of Cooling Towers and Methods to Improve it. 18.13. Cooling Towers Environmental Effects. 18.14. Analysis of Cooling Towers. 18.15. Water Treatment System for Cooling Pond and Cooling Tower. 18.16. Algae Growth and Its Prevention. 18.17. Problem of Minerals Concentration and Its Prevention.	
19. Feed-Water Treatment	19.1—19.30
19.1. Necessity of Feed-Water Treatment. 19.2. Different Impurities in Water. 19.3. Effects of Impurities. 19.4. pH Value of the Water and its Importance. 19.5. Different Methods of Water Treatment. 19.6. Internal Boiler Water Treatment for Scale Prevention. 19.7. External Treatment System. 19.8. Sea Water Treatment Using Reverse Osmosis (RO). 19.9. Nuclear Reactors and Importance of Water Purity.	
20. Steam Piping	20.1—20.8
20.1. Steam Piping. 20.2. Steam Pipe Fittings. 20.3. Expansion Joints and Loops. 20.4. Piping Supports. 20.5. Design of Steam Piping. 20.6. Steam Piping Materials. 20.7. Insulation of Steam Piping. 20.8. Piping Layouts.	
21. Power Plant Layouts	21.1—21.7
21.1. General Design of Power Plants. 21.2. Architectural Features. 21.3. Inline Arrangement of Units. 21.4. Units Perpendicular to each other or Parallel to Division Wall. 21.5. One-room One-floor Station. 21.6. Unit Plan Station. 21.7. Outdoor Type Steam Electric Station. 21.8. Lighting of Steam Power Plants.	

<i>Chapters</i>	<i>Pages</i>
22. Cycles for Steam Power Plants 22.1. Rankine Cycle and its Analysis. 22.2. Reheat cycle. 22.3. Regenerative Cycle. 22.4. Reheat-Regenerative Cycle. 22.5. Binary Vapour Cycle. 22.6. Superposed or Topping Cycle.	22.1—22.67
PART III	
23. Diesel Electric Power Plants 23.1. Introduction. 23.2. Field of Use. 23.3. Outline of Diesel Electric Plant. 23.4. Types of Engines used for Diesel Power Plants. 23.5. Thermodynamic Cycles and Cycle Analysis. 23.6. Different Systems of Diesel Power Plant. 23.7. Supercharging of Diesel Engines. 23.8. Performance of the Diesel Power Plant. 23.9. Plant Layout. 23.10. Advantages and Disadvantages of Diesel Plant over Thermal Plants. 23.11. Present Trends in Diesel Research.	23.1—23.16
24. Gas Turbine Power Plants 24.1. Introduction. 24.2. Gas Turbine Plant. 24.3. Classification and Comparison of Different Types of Gas Turbine Power Plants. 24.4. Analysis of Closed Cycle and Open Cycle Constant Pressure Gas Turbine Plants. 24.5. Methods to Improve the Thermal Efficiency of a Simple Open Cycle Constant Pressure Gas Turbine Power Plant. 24.6. Components of Gas Turbine Plant. 24.7. Different Arrangements of Plant Components. 24.8. Governing System for Gas Turbine Power Plant. 24.9. Indian Gas Turbine Power Plants. 24.10. Advantages of Gas Turbine Plant over Diesel and Thermal Power Plants. 24.11. Environmental Impact of Gas Turbine Power Plants.	24.1—24.93
25. Gas and Steam Turbines Combined Cycles 25.1. Introduction. 25.2. Arrangements of Combined Cycles. 25.3. Repowering System. 25.4. Combined Cycle with Gas Production from Coal. 25.5. Combined Cycles using PFBC-System. 25.6. Combined Cycles with Organic Fluids. 25.7. Consideration for Best Mix. 25.8. Optimum Design of Gas Turbine Unit for Combined Cycle Plant. 25.9. Advantages of Combined Cycle. 25.10. Parameters affecting Thermodynamic Efficiency of Simple G.T. Cycle and Combined Cycle. 25.11. Performance of Combined Cycle. 25.12. Economics of Combined Cycle. 25.13. The Future of Combined Cycle. 25.14. Fuels for Gas Turbines and Future for Combined Cycle in India. 25.15. Some Combined Cycle Plants in India. 25.16. Nuclear-Steam Combined Cycle.	25.1—25.46
26. Waste Heat Recovery Systems 26.1. Introduction. 26.2. Sources of Waste Heat and their Grading. 26.3. Thermodynamic Cycles for Waste Heat Recovery. 26.4. Heat Recovery Forms and Methods. 26.5. Other Uses of Heat. 26.6. Heat Pump Systems. 26.7. Different Wastes for Power Generation. 26.8. Heat Recovery and Waste Heat Boilers.	26.1—26.16
PART IV	
27. Introduction to Nuclear Engineering 27.1. Introduction. 27.2. Why Nuclear Power for Developing Countries. 27.3. Atomic Nuclei. 27.4. Atomic Number and Mass Number. 27.5. Isotopes. 27.6. Atomic Mass Unit. 27.7. Radioactivity and Radioactive Change. 27.8. Rate of Radioactive Decay. 27.9. Mass-Energy Equivalence. 27.10. Binding Energy. 27.11. Release of Energy by Nuclear Reaction. 27.12. Types of Nuclear Reactions. 27.13. Initiation of Nuclear Reaction. 27.14. Nuclear Cross-section. 27.15. Nuclear Fission. 27.16. The Fission Chain Reaction. 27.17. Moderation. 27.18. Fertile Materials and Breeding.	27.1—27.20

Chapters

	<i>Pages</i>
28. Nuclear Reactors	28.1—28.40
28.1. Introduction. 28.2. General Components of Nuclear Reactor. 28.3. General Problems of Reactor Operation. 28.4. Different Types of Reactors. 28.4.1. Pressurised Water Reactors (PWR). 28.4.2. Boiling Water Reactors (BWR). 28.4.3. Heavy Water-cooled and Moderated CANDU (Canadian Deuterium Uranium) Type Reactors. 28.4.4. Gas-cooled Reactors. 28.4.5. Liquid Metal-cooled Reactors. 28.4.6. Organic Moderated and Cooled Reactors. 28.5. Breeder Reactors. 28.6. Reactor Containment Design. 28.7. Location of Nuclear Power Plant. 28.8. Nuclear Power Stations in India. 28.9. India's 3-Stage Programme for Nuclear Power Development. 28.10 Comparison of Nuclear Plants with Thermal Plants.	
29. Nuclear Materials	29.1—29.17
29.1. Introduction. 29.2. Fuels. 29.3. Cladding and Structural Materials. 29.4. Coolants. 29.5. Moderating and Reflecting Materials. 29.6. Control Rod Materials. 29.7. Shielding Materials.	
30. Nuclear Waste & Its Disposal	30.1—30.15
30.1. Introduction. 30.2. Unit of Nuclear Radiation. 30.3. Types of Nuclear Waste. 30.4. Effects of Nuclear Radiation. 30.5. Radioactive Waste Disposal System. 30.6. Gas Disposal System.	
PART V	
31. Non-Conventional Power Generation and Direct Energy Conversion Systems	31.1—31.40
31.1. Introduction. 31.2. Geothermal Power Plants. 31.3. Tidal Power Plants. 31.4. Wind Power Plants. 31.5. Solar Plants. 31.6. Direct Energy Conversion Systems.	
32. Fluctuating Loads on Power Plants	32.1—32.38
32.1. Introduction. 32.2. Load Curves. 32.3. Different Terms and Definitions. 32.4. Effects of Variable Load on Power Plant Design and Operation.	
33. Peak Load Plants	33.1—33.26
33.1. Introduction. 33.2. What is Peak Load Plant ? 33.3. Requirements of Peak Load Plants. 33.4. Means of Meeting the Total Load Demand. 33.5. Pump-storage Power Plants. 33.6. Compressed Air-storage Plants. 33.7. Steam Power Stations as Peak Load Plants.	
34. Economic Analysis of Power Plants and Tariffs	34.1—34.45
34.1. Introduction. 34.2. The Cost of Electrical Energy. 34.3. Selection of Type of Generation. 34.4. Selection of Generating Equipments. 34.5. Performance and Operating Characteristics of Power Plants. 34.6. Load Division. 34.7. Tariff Methods for Electrical Energy.	
35. Combined Operation of Different Power Plants	35.1—35.17
35.1. Introduction. 35.2. Advantages of Combined Working. 35.3. Load Division Between Power Stations. 35.4. Storage Type Hydro-electric Plant in Combination with Steam Plant. 35.5. Run-of-river Plant in Combination with Steam Plant. 35.6. Pump Storage Plant in Combination with Steam or Nuclear Power Plant. 35.7. Co-ordination of Hydro-electric and Gas Turbine Stations. 35.8. Co-ordination of Hydro-electric and Nuclear Power Stations. 35.9. Co-ordination of Different Types of Power Plants.	

<i>Chapters</i>	<i>Pages</i>
PART VI	
36. Instrumentation and Control	36.1—36.16
36.1. Importance of Measurement and Instrumentation in Power Plant. 36.2. Measurement of Water Purity. 36.3. Gas Analysis, O ₂ and CO ₂ Measurements. 36.4. Measurement of Smoke and Dust. 36.5. Measurement of Moisture in Carbon Dioxide Circuit. 36.6. Nuclear Measurements.	
37. Pollution and its Control	37.1—37.23
37.1. Introduction. 37.2. Air and Water Pollution by Thermal Power Plants. 37.3. Water Pollution by Thermal Plants and Its Control. 37.4. Acid Rains. 37.5. Thermal Pollution by Thermal and Nuclear Power Plants. 37.6. Radio- active Pollution of Environment by Nuclear Power Plants. 37.7. Noise Pollution and Noise Control. 37.8. Methods suggested to reduce the Pollution. 37.9. Standardization for Environmental Pollution.	
38. Green House Effect and Its Control	38.1—38.28
38.1. Introduction. 38.2. CO ₂ and its Role in the Biological Life. 38.3. What is Green-House Effect. 38.4. O ₃ (Ozone) as a Green House Gas. 38.5. The Other Green House Gases (GHGs). 38.6. Trend of CO ₂ increase in Atmosphere. 38.7. Effects of Green-House on the Earth. 38.8. Control of Green House Effect. 38.9. Costs of CO ₂ Abatement. 38.10. Carbon Fixation Methods and Ocean Dumping.	
39. Major Electrical Equipments in Power Plants	39.1—39.29
39.1. Introduction. 39.2. Layout of Electrical Equipments. 39.3. Generator and Exciters. 39.4. Short Circuits in Electrical Installations and Limiting Methods. 39.5. Switchgear Installations. 39.6. Circuit Breakers. 39.7. Power Transformers. 39.8. Methods of Earthing a Power System. 39.9. Voltage Regulation. 39.10. Control Room.	
40. Energy Conservation and Management	40.1—40.31
40.1. Introduction. 40.2. Energy Requirements in Future. 40.3. Distribution of Energy Consumption. 40.4. Need for Energy Conservation. 40.5. Methods of Energy Conservation. 40.6. What is Energy Management? 40.7. Energy Management Techniques.	
APPENDICES	
(A) India's Power Information	A-1—A-12
(B) World's Power Information	B-1—B-9
(C) Hydel Power Information	C-1—C-6
(D) Thermal Power Information	D-1—D-12
(E) Nuclear Power Information	E-1—E-7
(F) General Information for Power Plants	F-1—F-4
Bibliography	L-1—L-35
