<i>Chapter</i>	<i>Pages</i>
INTRODUCTION TO SI UNITS AND CONVERSION FACTORS	(xxi)
1. INTRODUCTION	1-29
1.1. Energy and Power	1
1.2. Sources of Energy	2
1.2.1. Fuels	2
1.2.2. Energy stored in water	7
1.2.3. Nuclear energy	8
1.2.4. Wind Power	8
1.2.5. Solar energy	9
1.2.6. Tidal Power	9
1.2.7. Geothermal energy	10
1.2.8. Thermo-electric power	11
1.3. Principal Types of Power Plants	11
1.4. Combustion of Fuels	12
1.4.1. Combustion chemistry	12
1.4.2. How to convert volumetric analysis to weight analysis ?	14
1.4.3. How to convert weight analysis to volumetric analysis ?	14
1.4.4. Weight of air required for complete combustion of fuel	14
1.4.5. Excess air	14
1.4.6. Weight of carbon in flue gases	15
1.4.7. Weight of flue gases per kg of fuel burnt	15
<i>Worked Examples</i>	15
<i>Highlights</i>	27
<i>Theoretical Questions</i>	27
<i>Unsolved Examples</i>	28
2. POWER PLANT CYCLES	30-90
2.1. Introduction	30
2.2. Classification of Power Plant Cycles	30
2.3. Carnot Cycle	30
2.4. Rankine Cycle	32
2.5. Modified Rankine Cycle	42
2.6. Reheat Cycle	47
2.7. Regenerative Cycle	53
2.8. Binary Vapour Cycle	62
2.9. Otto Cycle	69

<i>Chapter</i>	<i>Pages</i>
2.10. Diesel Cycle	76
2.11. Dual Combustion Cycle	78
2.12. Gas Turbine Cycles	87
<i>Highlights</i>	87
<i>Theoretical Questions</i>	88
<i>Unsolved Examples</i>	88
3. STEAM POWER PLANT	91–348
3.1. Introduction	92
3.2. Classification of Steam Power Plants	92
3.3. Layout of a Modern Steam Power Plant	93
3.4. Essential Requirements of Steam Power Station Design	94
3.5. Selection of Site for Steam Power Station	94
3.6. Capacity of Steam Power Plant	96
3.7. Choice of Steam Conditions	97
3.8. Fuel Handling	99
3.8.1. Introduction	99
3.8.2. Requirements of good coal handling plant	100
3.8.3. Coal handling systems	100
3.8.4. Coal handling	101
3.8.5. Layout of a fuel handling equipment	108
3.9. Combustion Equipment for Steam Boilers	109
3.9.1. General aspects	109
3.9.2. Combustion equipment for solid fuels—selection considerations	110
3.9.3. Burning of coal	110
3.9.4. Burners	122
3.10. Fluidised Bed Combustion (FBC)	129
3.11. Ash Handling	131
3.11.1. Ash handling equipment	131
3.11.2. Ash handling systems	132
3.12. Dust Collection	136
3.12.1. Introduction	136
3.12.2. Removal of smoke	136
3.12.3. Removal of dust and dust collectors	136
3.12.4. Efficiency of dust collectors	140
3.12.5. Installation of dust collectors	141
3.12.6. Uses of ash and dust	141
3.12.7. General layout of ash handling and dust collection system	141
3.12.8. Flyash—Its composition, disposal and applications	142
3.13. Chimney Draught	143
3.13.1. Definition and classification of draught	143
3.13.2. Natural draught	143
3.13.3. Chimney height and diameter	144
3.13.4. Condition for maximum discharge through a chimney	146
3.13.5. Efficiency of a chimney	148
3.13.6. Draught losses	148
3.13.7. Artificial draught	149

<i>Chapter</i>	<i>Pages</i>
3.13.8. Forced draught	149
3.13.9. Induced draught	149
3.13.10. Balanced draught	149
3.13.11. Advantages of mechanical draught	149
3.13.12. Steam jet draught	150
3.14. Boilers	154
3.14.1. Introduction	154
3.14.2. Classification of boilers	155
3.14.3. Comparison between 'Fire-tube and water tube' boilers	156
3.14.4. Selection of a boiler	156
3.14.5. Essentials of a good steam boiler	157
3.14.6. Boiler terms	157
3.14.7. Fire tube boilers	158
3.14.8. Water tube boilers	165
3.14.9. High pressure boilers	168
3.15. Accessories	177
3.15.1. Feed pumps	178
3.15.2. Injector	179
3.15.3. Economiser	180
3.15.4. Air Preheater	182
3.15.5. Superheater	184
3.15.6. Steam separator	185
3.16. Feed Water Heaters and Evaporators	186
3.16.1. Feed water heaters	186
3.16.2. Miscellaneous heaters	188
3.16.3. Evaporators	188
3.16.4. Typical utility cycle layout	189
3.17. Performance of Boilers	190
3.17.1. Evaporative capacity	190
3.17.2. Equivalent evaporation	190
3.17.3. Factor of evaporation	190
3.17.4. Boiler efficiency	190
3.17.5. Heat losses in a boiler plant	191
3.18. Steam Nozzles	198
3.18.1. Introduction	198
3.18.2. Steam flow through nozzles	199
3.18.3. Discharge through the nozzle and conditions for its maximum value	199
3.18.4. Nozzle efficiency	203
3.18.5. Super saturated or metastable expansion of steam in a nozzle	205
3.19. Steam Turbines	211
3.19.1. Introduction	211
3.19.2. Classification of steam turbines	211
3.19.3. Advantages of steam turbine over the steam engines	213
3.19.4. Description of common types of turbines	213
3.19.5. Methods of reducing wheel or rotor speed	215
3.19.6. Difference between impulse and reaction turbines	219

<i>Chapter</i>	<i>Pages</i>
3.19.7. Impulse turbines	219
3.19.8. Reaction turbines	228
3.19.9. Turbines efficiencies	232
3.19.10. Types of power in steam turbine practice	233
3.19.11. Energy losses in steam turbines	234
3.19.12. Steam turbine governing and control	235
3.19.13. Special forms of turbines	238
3.20. Steam Condensers	257
3.20.1. Introduction	257
3.20.2. Vacuum	257
3.20.3. Organs of a steam condensing plant	257
3.20.4. Classification of condensers	258
3.20.5. Jet condensers	258
3.20.6. Surface condensers	261
3.20.7. Reasons for inefficiency in surface condensers	263
3.20.8. Comparison between jet and surface condensers	264
3.20.9. Selection of condenser	264
3.20.10. Sources of air in condensers	265
3.20.11. Effects of air leakage in a condenser	265
3.20.12. Method for obtaining maximum vacuum in condensers	265
3.20.13. Vacuum measurement	266
3.20.14. Vacuum efficiency	266
3.20.15. Condenser efficiency	267
3.20.16. Determination of mass of cooling water	267
3.20.17. Heat transmission through walls of tubes of a surface condenser	267
3.20.18. Methods of cleaning condenser tubes	268
3.21. Cooling Ponds and Cooling Towers	269
3.21.1. Introduction	269
3.21.2. River or sea	269
3.21.3. Cooling ponds	270
3.21.4. Spray ponds	271
3.21.5. Cooling towers	271
3.21.6. Dry cooling towers	275
3.21.7. Maintenance of cooling towers	277
3.22. Feed Water Treatment	290
3.22.1. Classification of impurities in water	290
3.22.2. Troubles caused by the impurities in water	291
3.22.3. Methods of feed water treatment	292
3.22.4. pH value of water	297
3.23. Piping System	297
3.23.1. Requirements of steam piping system	297
3.23.2. Materials used for pipes	298
3.23.3. Insulation of steam piping	298
3.23.4. Steam pipe fittings	299
3.23.5. Pipe expansion bends	299
3.24. Advantages and Disadvantages of Steam Power Plants	301

<i>Chapter</i>	<i>Pages</i>
3.25. Miscellaneous	301
3.25.1. Plant arrangement	301
3.25.2. Useful life of steam power plant components	303
3.25.3. Steam power plant pumps	303
3.25.4. Cost of steam power plant	304
3.25.5. Comparison of various types of power plants	304
3.25.6. Thermal power stations in India	306
3.25.7. Indian boilers Act	306
<i>Highlights</i>	332
<i>Theoretical Questions</i>	335
<i>Unsolved Examples</i>	336
<i>Competitive Examination Questions</i>	342
4. DIESEL ENGINE POWER PLANT	349–425
4.1. Introduction	349
4.2. Advantages and Disadvantages of Diesel Power Plants	349
4.3. Applications of Diesel Power Plant	350
4.4. Site Selection	350
4.5. Heat Engines	351
4.6. Classification of I.C. Engines	351
4.7. Different Parts of I.C. Engines	352
4.8. Terms Connected with I.C. Engines	353
4.9. Four Stroke Cycle Diesel Engines	354
4.10. Two Stroke Cycle Diesel Engines	356
4.11. Comparison of Four Stroke and Two Stroke Cycle Engines	357
4.12. Comparison between a Petrol Engine and a Diesel Engine	358
4.13. Essential Components of a Diesel Power Plant	358
4.13.1. Engine	359
4.13.2. Air intake system	359
4.13.3. Exhaust system	359
4.13.4. Fuel system	360
4.13.5. Cooling systems	366
4.13.6. Lubrication systems	372
4.13.7. Engine starting system	376
4.13.8. Governing system	377
4.14. Combustion Phenomenon in C.I. Engines	377
4.15. Delay Period (or Ignition Lag) in C.I. Engines	379
4.16. Diesel Knock	380
4.17. Cetane Number	380
4.18. Basic Designs of C.I. Engine Combustion Chambers	381
4.19. Supercharging	382
4.20. Operation of a Diesel Power Plant	386
4.21. Types of Diesel Engine used for Diesel Power Plants	386
4.22. Layout of a Diesel Engine Power Plant	387

<i>Chapter</i>	<i>Pages</i>
4.23. Performance of I.C. Engines	... 387
<i>Highlights</i>	... 419
<i>Theoretical Questions</i>	... 420
<i>Unsolved Examples</i>	... 421
<i>Competitive Examinations Questions</i>	... 424
5. GAS TURBINE POWER PLANTS	... 426–523
5.1. Gas Turbines—General Aspects	... 426
5.2. Applications of Gas Turbine Plants	... 427
5.3. Advantages and Disadvantages of Gas Turbine Power Plants Over Diesel and Thermal Power Plants	... 427
5.4. Site Selection	... 428
5.5. The Simple Gas Turbine Plant	... 429
5.6. Energy Cycle for a Simple-Cycle Gas Turbine	... 429
5.7. Performance Terms	... 430
5.8. Classification of Gas Turbine Power Plants	... 431
5.9. Classification of Gas Turbines	... 431
5.10. Merits of Gas Turbines	... 431
5.11. Constant Pressure Combustion Gas Turbines	... 433
5.11.1. Open cycle gas turbines	... 433
5.11.2. Methods for improvement of thermal efficiency of open cycle gas turbine plant	... 435
5.11.3. Closed cycle gas turbine (constant pressure or joule cycle)	... 440
5.11.4. Merits and demerits of closed cycle turbine over open cycle turbine	... 447
5.12. Constant Volume Combustion Turbines	... 447
5.13. Gas Turbine Fuels	... 448
5.14. Effect of Operating Variables on Thermal Efficiency	... 449
5.15. Combination Gas Turbine Cycles	... 451
5.15.1. Combined gas turbine and steam power plants	... 451
5.15.2. Combined gas turbine and diesel power plants	... 455
5.16. Operation of a Gas Turbine	... 456
5.17. Gas Turbine Power Plant Layout	... 457
5.18. Components of a Gas Turbine Power Plant	... 458
5.19. Various Arrangements of Gas Turbine Power Plants	... 462
5.20. Effect of Thermodynamic Variables on Air Rate	... 465
5.21. Free-Piston Engine Plant	... 467
5.22. Relative Thermal Efficiencies of Different Cycles	... 469
<i>Highlights</i>	... 518
<i>Theoretical Questions</i>	... 519
<i>Unsolved Examples</i>	... 519
<i>Competitive Examinations Questions</i>	... 521
6. HYDRO-ELECTRIC POWER PLANT	... 524–639
6.1. Introduction	... 524
6.2. Application of Hydro-electric Plants	... 525

<i>Chapter</i>	<i>Pages</i>
6.3. Advantages and Disadvantages of Hydro-electric Plants	525
6.4. Selection of Site for a Hydro-electric Plant	526
6.5. Essential Features/Elements of Hydro-electric Power Plant	527
6.5.1. Catchment area	527
6.5.2. Reservoir	527
6.5.3. Dam	527
6.5.4. Spillways	533
6.5.5. Conduits	536
6.5.6. Surge tanks	538
6.5.7. Primemovers	541
6.5.8. Draft tubes	541
6.5.9. Power house and equipment	542
6.6. Classification of Hydro-electric Power Plants	543
6.6.1. High head power plants	544
6.6.2. Medium head power plants	544
6.6.3. Low head power plants	545
6.6.4. Base load plants	545
6.6.5. Peak load plants	545
6.6.6. Run-of-river plants without pondage	545
6.6.7. Run-of-river plants with pondage	546
6.6.8. Storage type plants	546
6.6.9. Pumped storage plants	546
6.6.10. Mini and microhydel plants	547
6.7. Hydraulic Turbines	547
6.7.1. Classification of hydraulic turbines	547
6.7.2. Description of various types of turbines	549
6.7.3. Specific speed of a turbine	563
6.7.4. Efficiencies of a turbine	568
6.7.5. Cavitation	568
6.7.6. Performance of hydraulic turbines	569
6.7.7. Governing of hydraulic turbines	573
6.7.8. Selection of turbines	575
6.8. Plant Layout	576
6.9. Hydro-plant Auxiliaries	577
6.10. Cost of Hydro-plant	577
6.11. Average Life of Hydro-plant Components	578
6.12. Hydro-plant Controls	578
6.13. Electrical and Mechanical Equipment in a Hydro-plant	579
6.14. Combined Hydro and Steam Power Plants	580
6.15. Comparison of Hydro-power Station with Thermal Power Stations	580
6.16. Underground Hydro-plants	581
6.17. Automatic and Remote Control of Hydro-station	583
6.18. Safety Measures in Hydro-electric Power Plants	583
6.19. Preventive Maintenance of Hydro-plant	584
6.20. Calculation of Available Hydro-power	585
6.21. Cost of Hydro-power	585

<i>Chapter</i>	<i>Pages</i>
6.22. Hydrology	585
6.22.1. Introduction	585
6.22.2. The hydrologic cycle	586
6.22.3. Measurement of run-off	586
6.22.4. Hydrograph	588
6.22.5. Flow duration curve	590
6.22.6. Mass curve	592
6.23. Hydro-Power Development in India	593
<i>Worked Examples</i>	594
<i>Highlights</i>	632
<i>Theoretical Questions</i>	633
<i>Unsolved Examples</i>	634
<i>Competitive Examinations Questions</i>	636
7. NUCLEAR POWER PLANT	640-695
7.1. General Aspects of Nuclear Engineering	640
7.1.1. Atomic structure	640
7.1.2. Atomic mass unit	642
7.1.3. Isotopes	642
7.1.4. Radioactivity	643
7.1.5. Nuclear radiation	644
7.1.6. Binding energy	645
7.1.7. Radioactive decay	646
7.1.8. Nuclear reactions	648
7.1.9. Nuclear cross-sections	649
7.1.10. Fertile materials	650
7.1.11. Fission of nuclear fuel	651
7.1.12. Nuclear fusion	654
7.1.13. Comparison of fission and fusion processes	654
7.2. Nuclear Power Systems	655
7.3. Nuclear Reactors	657
7.3.1. Introduction	657
7.3.2. Classification of nuclear reactors	657
7.3.3. Essential components of a nuclear reactor	659
7.3.4. Power of a nuclear reactor	663
7.4. Main Components of a Nuclear Power Plant	664
7.5. Description of Reactors	664
7.5.1. Pressurised water reactor (PWR)	664
7.5.2. Boiling water reactor (BWR)	666
7.5.3. CANDU (Canadian-Deuterium-Uranium) Reactor	666
7.5.4. Gas cooled reactor	668
7.5.5. Liquid metal cooled reactors	670
7.5.6. Breeder reactor	671
7.6. Selection of Materials for Reactor Components	672
7.7. Metals for Nuclear Energy	675
7.8. Advantages of Nuclear Power Plants	677
7.9. Nuclear-Plant Site Selection	678

<i>Chapter</i>	<i>Pages</i>
7.10. Application of Nuclear Power Plants	681
7.11. Economics of Nuclear Power Plants	681
7.12. Safety Measures for Nuclear Power Plants	684
7.13. Nuclear Power Plants in India	685
7.14. Future of Nuclear Power	685
7.15. Useful by-products of Nuclear Power Generator and Their Uses	685
<i>Worked Examples</i>	687
<i>Highlights</i>	692
<i>Theoretical Questions</i>	693
<i>Unsolved Examples</i>	694
<i>Competitive Examinations Questions</i>	695
8. COMBINED OPERATION OF DIFFERENT POWER PLANTS	696-711
8.1. General Aspects	696
8.2. Advantages of Combined Operation of Plants	696
8.3. Load Division Between Power Stations	697
8.4. Hydro-electric (storage type) Plant in Combination with Steam Plant	700
8.5. Run-of-river Plant in Combination with Steam Plant	701
8.6. Pump Storage Plant in Combination with Steam or Nuclear Power Plant	701
8.7. Co-ordination of Hydro-electric and Gas Turbine Stations	702
8.8. Co-ordination of Different Types of Power Plants	702
<i>Worked Examples</i>	703
<i>Theoretical Questions</i>	710
<i>Unsolved Examples</i>	710
9. ECONOMICS OF POWER GENERATION	712-794
9.1. Introduction	712
9.2. Terms and Definitions	712
9.3. Principles of Power Plant Design	715
9.4. Location of Power Plant	716
9.5. Layout of Power Plant Building	716
9.6. Cost Analysis	717
9.7. Selection of Type of Generation	721
9.8. Selection of Power Plant Equipment	721
9.8.1. Selection of boilers	721
9.8.2. Selection of prime-movers	722
9.8.3. Selection of size and number of generating units	722
9.9. Economics in Plant Selection	724
9.10. Factors Affecting Economics of Generation and Distribution of Power	725
9.11. How to Reduce Power Generation Cost ?	726
9.12. Power Plant—Useful Life	726
9.13. Economics of Hydro-electric Power Plants	727
9.14. Economics of Combined Hydro and Steam Power Plants	728
9.15. Performance and Operating Characteristics of Power Plants	728

<i>Chapter</i>	<i>Pages</i>
9.16. Economic Load Sharing	730
9.17. Tariff for Electrical Energy	733
9.17.1. Introduction	733
9.17.2. Objectives and requirements of tariff	733
9.17.3. General tariff form	733
<i>Worked Examples</i>	737
<i>Highlights</i>	780
<i>Theoretical Questions</i>	781
<i>Unsolved Examples</i>	781
<i>Competitive Examinations Questions</i>	790
10. NON-CONVENTIONAL POWER GENERATION AND DIRECT ENERGY CONVERSION	795–860
10.1. Introduction to Energy and Energy Sources	795
10.1.1. Energy	795
10.1.2. Non-conventional energy sources	798
10.2. Wind Power Plants	799
10.2.1. Introduction	799
10.2.2. Characteristics of wind	800
10.2.3. Advantages and disadvantages of wind energy	800
10.2.4. Sources/Origins of wind	800
10.2.5. Wind availability and measurement	801
10.2.6. Wind power	801
10.2.7. Terms and definitions	803
10.2.8. Types of wind mills	805
10.2.9. Wind-electric generating power plant	807
10.2.10. Types of wind machines	808
10.2.11. Utilisation aspects of wind energy	810
10.2.12. Generating systems	810
10.2.13. Wind-powered battery chargers	811
10.2.14. Wind electricity in small independent grids	812
10.2.15. Wind electricity economics	813
10.2.16. Problems in operating large wind power generators	813
10.2.17. Considerations for selection of site for wind energy conversion systems	814
10.3. Tidal Power Plants—Ocean Energy Conversion	814
10.3.1. Ocean energy sources—General aspects	814
10.3.2. Tidal power plants	814
10.3.3. Wave energy	818
10.3.4. Ocean thermal energy conversion (OTEC) plant	819
10.4. Solar Power Plants	821
10.4.1. Solar energy—General terms and introduction	821
10.4.2. Collectors in various ranges and applications	822
10.4.3. Flat plate collectors	823
10.4.4. Focusing (or concentrating) collectors	825
10.4.5. Solar pond technology	826
10.4.6. Low temperature thermal power generation	828

<i>Chapter</i>	<i>Pages</i>
10.4.7. Medium temperature systems using focusing collectors ...	829
10.4.8. High temperature systems—solar farm and solar power plant ...	830
10.5. Geothermal Power Plants ...	831
10.5.1. Geothermal energy ...	831
10.5.2. Geothermal sources ...	832
10.5.3. Geothermal power estimates ...	834
10.5.4. Environmental problems ...	834
10.5.5. Applications of geothermal energy ...	834
10.5.6. Advantages and disadvantages of geothermal energy over other energy forms ...	835
10.5.7. Geothermal energy in India and abroad ...	835
10.6. Biogas Plants-Biomass ...	836
10.6.1. Introduction to biomass ...	836
10.6.2. Biomass conversion processes ...	837
10.6.3. Biogas plants ...	838
10.7. Direct Energy Conversion Systems ...	844
10.7.1. Thermoelectric conversion system ...	844
10.7.2. Thermionic conversion system ...	847
10.7.3. Photovoltaic power system ...	849
10.7.4. Magnetohydrodynamics (MHD) system ...	852
10.7.5. Electrostatic mechanical generators ...	854
10.7.6. Electro gas-dynamic generators (EGD) ...	855
10.7.7. Fuel cells ...	856
10.7.8. Nuclear batteries ...	858
<i>Highlights</i> ...	859
<i>Theoretical Questions</i> ...	860
<i>Competitive Examinations Questions</i> ...	860
11. PLANT INSTRUMENTATION ...	861-897
11.1. General Aspects ...	861
11.2. Classification of Instruments ...	861
11.3. Pressure Gauges ...	862
11.3.1. Pressure ...	862
11.3.2. Types of pressure measurement devices ...	863
11.3.3. Mechanical-type instruments ...	863
11.3.4. Electrical transducers ...	868
11.4. Thermometers ...	870
11.4.1. Temperature ...	870
11.4.2. Temperature measuring instruments ...	870
11.5. Liquid Level Gauges ...	878
11.5.1. Gauge glass ...	878
11.5.2. Electrical level gauges ...	878
11.6. Flow Meters ...	879
11.7. pH Measuring Instruments ...	879
11.8. Gas Analysers ...	880
11.9. Humidity Measuring Instruments ...	884
11.10. Impurity Measuring Instruments ...	888
11.11. Speed Measuring Instruments ...	889

<i>Chapter</i>	<i>Pages</i>
11.12. Steam Calorimeters and Fuel Calorimeters	... 889
11.12.1. Steam calorimeters	... 889
11.12.2. Fuel calorimeters	... 893
<i>Highlights</i>	... 896
<i>Theoretical Questions</i>	... 896
12. MAJOR ELECTRICAL EQUIPMENT IN POWER PLANTS	... 898–1002
12.1. Introduction	... 898
12.2. Generating Equipment	... 899
12.2.1. Classification	... 899
12.2.2. Two-wire direct current generators	... 899
12.2.3. Alternator-current generators	... 925
12.3. Transformers	... 945
12.3.1. General aspects	... 945
12.3.2. Basic definitions	... 945
12.3.3. Working principle of a transformer	... 946
12.3.4. Transformer ratings	... 946
12.3.5. Kinds of transformers	... 947
12.3.6. Transformer construction	... 947
12.3.7. Transformer windings, terminals, tappings and bushings	... 951
12.3.8. Transformer cooling	... 953
12.3.9. Three phase transformer	... 955
12.3.10. Instrument transformers	... 964
12.3.11. Constant-current transformers	... 966
12.4. Switchgear	... 967
12.4.1. Functions of a switchgear	... 967
12.4.2. Switches	... 967
12.4.3. Fuses	... 968
12.4.4. Circuit breakers	... 969
12.4.5. Types of switchgear	... 972
12.5. Protection of Electrical Systems	... 973
12.5.1. General aspects	... 973
12.5.2. Different types of relays	... 975
12.5.3. Alternator protection	... 977
12.5.4. Transformer protection	... 979
12.5.5. Bus protection	... 979
12.5.6. Protection of transmission lines	... 980
12.6. Short Circuits in Electrical Installations and Limiting Methods	... 982
12.7. Control Room	... 984
12.8. Earthing of a Power System	... 986
12.9. Electrical Equipment-Layout	... 988
12.10. Voltage Regulation	... 989
12.11. Transmission of Electric Power	... 990
12.11.1. System of transmission	... 990
12.11.2. Line supports	... 991
12.11.3. Conductor material	... 992
12.11.4. Line insulators	... 992

<i>Chapter</i>	<i>Pages</i>
12.11.5. Distribution systems	... 993
12.11.6. Underground cables	... 994
12.12. Substations	... 995
12.12.1. Classification of substations	... 995
12.13. Indian Electricity Act	... 997
<i>Highlights</i>	... 999
<i>Theoretical Questions</i>	... 1001
<i>Competitive Examinations Questions</i>	... 1002
13. POLLUTION AND ITS CONTROL	... 1003–1011
13.1. Introduction	... 1003
13.2. Pollution from Thermal Power Plants	... 1003
13.2.1. Gaseous emission and its control	... 1004
13.2.2. Particulate emission and its control	... 1006
13.2.3. Solid waste disposal	... 1008
13.2.4. Thermal pollution	... 1008
13.3. Pollution from Nuclear Power Plants	... 1009
13.4. Pollution from Hydro-electric Power Plants and Solar Power Generating Stations	... 1010
<i>Highlights</i>	... 1010
<i>Theoretical Questions</i>	... 1011
OBJECTIVE TYPE QUESTIONS BANK	... 1013
ADDITIONAL/COMPETITIVE EXAMINATIONS QUESTIONS (WITH SOLUTIONS–COMMENTS)	... 1053
INDEX	... 1081
APPENDIX	
Steam Tables	... 1–20
