

CONTENTS

<i>Preface</i>	xv
<i>List of Reviewers</i>	xvii
<i>Visual Walkthrough</i>	xviii
1. Mechanisms and Machines	1
1.1 Mechanism and Machine	1
1.2 Types of Constrained Motion	2
1.3 Rigid and Resistant Bodies	3
1.4 Link	3
1.5 Kinematic Pair	3
1.6 Types of Joints	5
1.7 Degrees of Freedom	5
1.8 Classification of Kinematic Pairs	6
1.9 Kinematic Chain	6
1.10 Linkage, Mechanism and Structure	7
1.11 Mobility of Mechanisms	7
1.12 Equivalent Mechanisms	14
1.13 The Four-bar Chain	18
1.14 Mechanical Advantage	23
1.15 Transmission Angle	23
1.16 The Slider-crank Chain	27
1.17 Double Slider-crank Chain	30
1.18 Miscellaneous Mechanisms	32
<i>Summary</i>	34
<i>Exercises</i>	35
2. Velocity Analysis	38
2.1 Absolute and Relative Motions	38
2.2 Vectors	38
2.3 Addition and Subtraction of Vectors	39
2.4 Motion of a Link	40
2.5 Four-link Mechanism	41
2.6 Velocity Images	42
2.7 Angular Velocity of Links	43
2.8 Velocity of Rubbing	43
2.9 Slider-crank Mechanism	44
2.10 Crank- and Slotted-lever Mechanism	54
2.11 Algebraic Methods	62
2.12 Instantaneous Centre (I-Centre)	64
2.13 Kennedy's Theorem	65

- 2.14 Locating I-Centres 66
- 2.15 Angular-velocity-ratio Theorem 68
- 2.16 Centrode 74
 - Summary 76
 - Exercises 76

3. Acceleration Analysis

79

- 3.1 Acceleration 79
- 3.2 Four-link Mechanism 81
- 3.3 Acceleration of Intermediate and Offset Points 83
- 3.4 Slider-crank Mechanism 85
- 3.5 Coriolis Acceleration Component 97
- 3.6 Crank and Slotted-lever Mechanism 99
- 3.7 Algebraic Methods 110
- 3.8 Klein's Construction 112
- 3.9 Velocity and Acceleration from Displacement-time Curve 113
- 3.10 Centre of Curvature 114
- 3.11 Hartmann Construction 115
- 3.12 Euler-Savary Equation 116
- 3.13 Bobillier Construction 118
- 3.14 Cubic of Stationary Curvature 120
 - Summary 121
 - Exercises 122

4. Computer-aided Analysis of Mechanisms

124

- 4.1 Four-link Mechanism 124
- 4.2 Use of Complex Algebra 131
- 4.3 The Vector Method 132
- 4.4 Slider-crank Mechanism 136
- 4.5 Coupler Curves 140
 - Summary 142
 - Exercises 143

5. Graphical and Computer-aided Synthesis of Mechanisms

144

Part A: Graphical Methods

- 5.1 Pole 144
 - 5.2 Relative Pole 146
 - 5.3 Function Generation by Relative Pole Method 148
 - 5.4 Inversion Method 151
 - 5.5 Function Generation by Inversion Method 151
 - 5.6 Path Generation 155
 - 5.7 Motion Generation (Rigid-body Guidance) 158
- Part B: Computer-aided Synthesis of Mechanisms
- 5.8 Function Generation 159
 - 5.9 Chebychev Spacing 166
 - 5.10 Path Generation 169

5.11 Motion Generation (Rigid-body Guidance)	175
<i>Summary</i>	179
<i>Exercises</i>	179
6. Lower Pairs	181
6.1 Pantograph	181
6.2 Straight-line Mechanisms	182
6.3 Engine Indicators	190
6.4 Automobile Steering Gears	194
6.5 Types of Steering Gears	195
6.6 Hooke's Joint	198
6.7 Double Hooke's Joint	205
<i>Summary</i>	206
<i>Exercises</i>	207
7. Cams	209
7.1 Types of Cams	209
7.2 Types of Followers	212
7.3 Definitions	213
7.4 Follower Displacement Programming	214
7.5 Derivatives of Follower Motion	215
7.6 High-speed Cams	216
7.7 Undercutting	216
7.8 Motions of the Follower	217
7.9 Layout of Cam Profiles	223
7.10 Cams with Specified Contours	232
7.11 Analysis of a Rigid Eccentric Cam	241
7.12 Analysis of an Elastic Cam System	244
7.13 Spring Surge, Unbalance and Wind Up	246
<i>Summary</i>	247
<i>Exercises</i>	247
8. Friction	250
8.1 Kinds of Friction	250
8.2 Laws of Friction	251
8.3 Coefficient of Friction	251
8.4 Inclined Plane	252
8.5 Screw Threads	256
8.6 Screw Jack	262
8.7 Wedge	265
8.8 Pivots and Collars	268
8.9 Friction Clutches	274
8.10 Rolling Friction	285
8.11 Anti-friction Bearings	285
8.12 Greasy Friction	286
8.13 Greasy Friction at a Journal	286

- 8.14 Friction Axis of a Link 287
- 8.15 Film Friction 290
- 8.16 Mitchell Thrust Bearing 291
 - Summary 292
 - Exercises 293

9. Belts, Ropes and Chains

296

- 9.1 Belt and Rope Drives 296
- 9.2 Open- and Crossed-belt Drives 298
- 9.3 Action of Belts on Pulleys 298
- 9.4 Velocity Ratio 299
- 9.5 Slip 299
- 9.6 Material for Belts and Ropes 301
- 9.7 Crowing of Pulleys 301
- 9.8 Types of Pulleys 302
- 9.9 Law of Belting 304
- 9.10 Length of Belt 304
- 9.11 One (Stepped) Pulleys 307
- 9.12 Ratio of Friction Tensions 310
- 9.13 Power Transmitted 312
- 9.14 Centrifugal Effect on Belts 315
- 9.15 Maximum Power Transmitted by a Belt 316
- 9.16 Initial Tension 320
- 9.17 Creep 324
- 9.18 Chains 325
- 9.19 Chain Length 326
- 9.20 Angular Speed Ratio 327
- 9.21 Classification of Chains 328
 - Summary 329
 - Exercises 330

10. Gears

332

- 10.1 Classification of Gears 333
- 10.2 Gear Terminology 337
- 10.3 Law of Gearing 342
- 10.4 Velocity of Sliding 343
- 10.5 Forms of Teeth 343
- 10.6 Cycloidal Profile Teeth 343
- 10.7 Involute Profile Teeth 345
- 10.8 Interchangeable Gears 348
- 10.9 Non-standard Gears 348
- 10.10 Path of Contact 349
- 10.11 Arc of Contact 350
- 10.12 Number of Pairs of Teeth in Contact (Contact Ratio) 351
- 10.13 Interference in Involute Gears 354
- 10.14 Minimum Number of Teeth 355

10.15	Interference Between Rack and Pinion	360	
10.16	Undercutting	361	
10.17	Comparison of Cycloidal and Involute Tooth Forms	362	
10.18	Helical and Spiral Gears	362	
10.19	Terminology of Helical Gears	364	
10.20	Velocity Ratio and Centre Distance of Helical Gears	364	
10.21	Helical Gear Forces and Efficiency	365	
10.22	Worm and Worm Gear	369	
10.23	Terminology of Worm Gears	370	
10.24	Velocity Ratio and Centre Distance of Worm Gears	370	
10.25	Efficiency of Worm Gears	371	
10.26	Bevel Gears	372	
	<i>Summary</i>	374	
	<i>Exercises</i>	375	
11.	Gear Trains		378
11.1	Simple Gear Train	378	
11.2	Compound Gear Train	379	
11.3	Reverted Gear Train	380	
11.4	Planetary or Epicyclic Gear Train	381	
11.5	Analysis of Epicyclic Gear Train	382	
11.6	Torques in Epicyclic Trains	390	
11.7	Sun and Planet Gear	394	
11.8	Bevel Epicyclic Gear	397	
11.9	Compound Epicyclic Gear	399	
11.10	Automotive Transmission Gear Trains	400	
11.11	Differentials	405	
	<i>Summary</i>	407	
	<i>Exercises</i>	407	
12.	Static Force Analysis		410
12.1	Constraint and Applied Forces	410	
12.2	Static Equilibrium	410	
12.3	Equilibrium of Two- and Three-force Members	411	
12.4	Member With Two Forces and a Torque	412	
12.5	Equilibrium of Four-force Members	412	
12.6	Force Convention	413	
12.7	Free-body Diagrams	413	
12.8	Superposition	414	
12.9	Principle of Virtual Work	426	
12.10	Friction in Mechanisms	428	
	<i>Summary</i>	431	
	<i>Exercises</i>	432	
13.	Dynamic Force Analysis		434
13.1	D'Alembert's Principle	434	

13.2	Equivalent Offset Inertia Force	435
13.3	Dynamic Analysis of Four-link Mechanisms	435
13.4	Dynamic Analysis of Slider-crank Mechanisms	437
13.5	Velocity and Acceleration of a Piston	437
13.6	Angular Velocity and Angular Acceleration of Connecting Rod	439
13.7	Engine Force Analysis	440
13.7	Turning Moment on Crankshaft	441
13.8	Dynamically Equivalent System	445
13.9	Inertia of the Connecting Rod	446
13.10	Inertia Force in Reciprocating Engines (Graphical Method)	449
13.11	Turning-moment Diagrams	458
13.12	Fluctuation of Energy	460
13.13	Flywheels	461
13.14	Dimensions of Flywheel Rims	469
13.15	Punching Presses	471
	<i>Summary</i>	474
	<i>Exercises</i>	474
14.	Balancing	477
14.1	Static Balancing	477
14.2	Dynamic Balancing	480
14.3	Transference of a Force From One Plane to Another	480
14.4	Balancing of Several Masses in Different Planes	481
14.5	Force Balancing of Linkages	488
14.6	Balancing of Reciprocating Mass	490
14.7	Balancing of Locomotives	492
14.8	Effects of Partial Balancing in Locomotives	492
14.9	Secondary Balancing	496
14.10	Balancing of Inline Engines	497
14.11	Balancing of V-engines	509
14.12	Balancing of W, V-8 and V-12 Engines	513
14.13	Balancing of Radial Engines	515
14.14	Balancing Machines	520
14.15	Field Balancing	524
	<i>Summary</i>	526
	<i>Exercises</i>	527
15.	Brakes and Dynamometers	530
15.1	Types of Brakes	530
15.2	Block or Shoe Brake	530
15.3	Band Brake	536
15.4	Band and Block Brake	541
15.5	Internal Expanding Shoe Brake	544
15.6	Effect of Braking	547
15.7	Types of Dynamometers	549
15.8	Prony Brake Dynamometer	550

- 15.9 Rope Brake Dynamometer 550
- 15.10 Belt Transmission Dynamometer 551
- 15.11 Epicyclic-train Dynamometer 552
- 15.12 Bevis-Gibson Torsion Dynamometer 553
- 15.13 Automotive Propulsion 553
 - Summary* 556
 - Exercises* 556

16. Governors

- 16.1 Types of Governors 559
- 16.2 Watt Governor (Simple Conical Governor) 560
- 16.3 Porter Governor 562
- 16.4 Proell Governor 566
- 16.5 Hartnell Governor 569
- 16.6 Hartung Governor 574
- 16.7 Wilson-Hartnell Governor (Radial-spring Governor) 575
- 16.8 Pickering Governor 578
- 16.9 Spring-controlled Gravity Governor 579
- 16.10 Inertia Governor 580
- 16.11 Sensitiveness of a Governor 582
- 16.12 Hunting 582
- 16.13 Isochronism 583
- 16.14 Stability 583
- 16.15 Effort of a Governor 583
- 16.16 Power of a Governor 585
- 16.17 Controlling Force 589
 - Summary* 594
 - Exercises* 594

559**17. Gyroscope**

- 17.1 Angular Velocity 597
- 17.2 Angular Acceleration 597
- 17.3 Gyroscopic Torque (Couple) 599
- 17.4 Gyroscopic Effect on Aeroplanes 601
- 17.5 Gyroscopic Effect on Naval Ships 602
- 17.6 Stability of an Automobile 605
- 17.7 Stability of a Two-wheel Vehicle 610
- 17.8 Rigid Disc at an Angle Fixed to a Rotating Shaft 612
 - Summary* 613
 - Exercises* 613

597**18. Vibrations**

- 18.1 Definitions 615
- 18.2 Types of Vibrations 616
- 18.3 Basic Features of Vibrating Systems 616
- 18.4 Degrees of Freedom 617

615

Section-I (Longitudinal Vibrations)	618
18.5 Free Longitudinal Vibrations	618
18.6 Displacement, Velocity and Acceleration	623
18.7 Inertia Effect of the Mass of Spring	624
18.8 Damped Vibrations	629
18.9 Logarithmic Decrement	633
18.10 Forced Vibrations	636
18.11 Forced-damped Vibrations	638
18.12 Magnification Factor	641
18.13 Vibration Isolation and Transmissibility	644
18.14 Forcing Due to Unbalance	646
18.15 Forcing Due to Support Motion	648
Section II (Transverse Vibrations)	650
18.16 Single Concentrated Load	650
18.17 Uniformly Loaded Shaft	651
18.18 Shaft Carrying Several Loads	654
18.19 Whirling of Shafts	657
Section III (Torsional Vibration)	659
18.20 Free Torsional Vibrations (Single Rotor)	659
18.21 Inertia Effect of Mass of Shaft	660
18.22 Multifilar Systems	661
18.23 Free Torsional Vibrations (Two-rotor System)	666
18.24 Free Torsional Vibrations (Three-rotor System)	667
18.25 Torsionally Equivalent Shaft	668
18.26 Free Torsional Vibrations of Geared System	671
Summary	673
Exercises	674

19. Automatic Control

19.1 Open and Closed-loop Control (Unmonitored and Monitored Control)	677
19.2 Amplification	678
19.3 Actuator (Servomotor)	678
19.4 Transducer	678
19.5 Block Diagrams	678
19.6 Lag in Response	679
19.7 Damping	680
19.8 First-order System Response	680
19.9 Second-order System Response	682
19.10 Transfer Function	682
19.11 Transfer Function Relationships	685
Summary	686
Exercises	686
