Preface to Second Edition

Preface

Chapter 1 Mechanisms

1.1	Introduction	1
1.2	Elements or links	2
1.2.1	Classification of links	2
1.3	Kinematic pairs	2
1.4	Constrained motion	3
1.5	Kinematic chain	4
1.6	Types of mechanisms	4
1.7	Mechanism and machines	4
1.8	Degrees of freedom	5
1.8.1	Degrees of freedom of planar mechanisms	5
1.9	Four-bar chain	7
1.10	Grashof's law	8
1.10.1	Crank-lever mechanism	8
1.10.2	Double lever mechanism	8
1.10.3	Double crank mechanism	9
1.11	Inversion of mechanisms	10
1.11.1	Inversions of a four-bar chain	10
1.11.2	Inversions of a single-slider--crank chain	12
1.12	Double slider--crank chain	15
1.12.1	Inversions of double slider--crank chain	15
	Exercises	26

Chapter 2 Kinematics

2.1	Introduction	29
2.2	Velocity diagrams	29
2.3	Determination of link velocities	30
2.3.1	Relative velocity method	31
2.3.2	Relative velocity of points in a kinematic link	31
2.3.3	Relative angular velocities	32
2.3.4	Relative velocity of points on the same link	33

2.3.5	Forces in a mechanism	33
2.3.6	Mechanical advantage	34
2.3.7	Four-bar mechanism	34
2.3.8	Slider-crank mechanism	36
2.3.9	Crank and slotted lever mechanism	37
2.3.10	Drag mechanism	38
2.3.11	Whitworth quick-return mechanism	39
2.3.12	Stone crusher mechanism	39
2.4	Instantaneous centre method	54
2.4.1	Velocity of a point on a link	54
2.4.2	Properties of instantaneous centre	55
2.4.3	Number of instantaneous centres	55
2.4.4	Types of instantaneous centres	55
2.4.5	Location of instantaneous centres	56
2.4.6	Arnold-Kennedy theorem	56
2.4.7	Method of locating instantaneous centres	57
2.4.8	Determination of angular velocity of a link	58
2.5	Acceleration diagrams	68
2.5.1	Total acceleration of a link	68
2.5.2	Acceleration of a point on a link	69
2.5.3	Absolute acceleration for a link	69
2.5.4	Acceleration centre	70
2.5.5	Acceleration diagram for four-bar mechanism	70
2.5.6	Acceleration diagram for the slider-crank mechanism	71
2.5.7	Four-bar mechanism with ternary link	72
2.6	Coriolis acceleration	75
2.7	Link sliding in a swivelling pin	81
2.8	Klein's construction	84
2.9	Analytical analysis of slider-crank mechanism	86
2.10	Complex mechanisms	88
	<i>Exercises</i>	96

Chapter 3 Lower Pairs

3.1	Introduction	111
3.2	Pantograph	111
3.3	Straight line motion mechanisms	112
3.3.1	Accurate straight line mechanisms	113
3.3.2	Approximate straight line mechanisms	117
3.4	Intermittent motion mechanisms	120
3.5	Parallel linkages	120
3.6	Engine pressure indicators	122
3.6.1	Types of Indicators	123
3.7	Automobile steering gear mechanisms	129
3.7.1	Fundamental equation for correct steering	129
3.7.2	Steering gears	129

3.8	Hooke's joint or universal coupling	135
3.8.1	Velocities of shafts	136
3.8.2	Angular acceleration of driven shaft	138
3.9	Double Hooke's joint	139
	<i>Exercises</i>	142

Chapter 4 Friction

4.1	Introduction	145
4.2	Types of friction	147
4.3	Laws of friction	147
4.4	Force analysis of a sliding body	148
4.4.1	Body resting on a horizontal plane	148
4.4.2	Body resting on an inclined plane with force inclined to the plane	149
4.4.3	Body resting on an inclined plane with horizontal force	150
4.5	Screw friction	151
4.5.1	Screw jack	151
4.6	Flat pivot bearing	155
4.6.1	Uniform pressure	155
4.6.2	Uniform wear	157
4.7	Conical pivot bearing	157
4.7.1	Uniform pressure	158
4.7.2	Uniform wear	159
4.8	Truncated conical pivot bearing	159
4.8.1	Uniform pressure	160
4.8.2	Uniform wear	160
4.9	Flat collar bearing	160
4.9.1	Uniform pressure	160
4.9.2	Uniform wear	161
4.10	Rolling friction	161
4.11	Friction circle	162
	<i>Exercises</i>	165

Chapter 5 Belts, Chains and Ropes

5.1	Introduction	167
5.2	Flat belt	167
5.2.1	Angular velocity ratio	167
5.2.2	Effect of slip	168
5.2.3	Law of belting	169
5.2.4	Length of open belt	169
5.2.5	Length of cross belt	170
5.2.6	Angle of arc of contact	171
5.2.7	Ratio of belt tensions	171
5.2.8	Power transmitted	172
5.2.9	Centrifugal tension	172

132	5.2.10	Condition for maximum power transmission	173
136	5.2.11	Initial belt tension	174
138	5.2.12	Effect of initial tension on power transmission	174
139	5.2.13	Belt creep	175
142	5.2.14	Crowning of pulleys	175
142	5.2.15	Cone pulleys	175
142	5.2.16	Compound belt drive	177
143	5.3	V-belt drive	181
142	5.3.1	Ratio of belt tensions	181
144	5.4	Chain drive	182
147	5.4.1	Chain pitch	183
148	5.4.2	Chain length	183
148	5.5	Ropes	184
149	5.5.1	Ratio of tensions	184
150		Exercises	185

Chapter 6 Brakes, Clutches and Dynamometers **189**

151	6.1	Introduction	189
152	6.2	Brakes	189
157	6.2.1	Block or shoe brake	189
158	6.2.2	Band brake	193
159	6.2.3	Band and block brake	194
159	6.2.4	Internal expanding shoe brake	195
160	6.2.5	Braking of a vehicle	198
163	6.3	Clutches	207
160	6.3.1	Single plate clutch	207
160	6.3.2	Multiple plate clutch	209
161	6.3.3	Cone clutch	209
164	6.4	Dynamometers	213
162	6.4.1	Absorption dynamometers	213
163	6.4.2	Transmission dynamometers	215
167		Exercises	218

Chapter 7 Cams **223**

167	7.1	Introduction	223
168	7.2	Types of cams and followers	223
170	7.3	Cam nomenclature	225
171	7.4	Follower motion	226
170	7.4.1	Simple harmonic motion	226
171	7.4.2	Motion with uniform acceleration and deceleration	227
171	7.4.3	Motion with uniform velocity	229
171	7.4.4	Parabolic motion	229
172	7.5	Procedure for drawing cam profile	233
172	7.5.1	Displacement diagram	236
	7.5.2	Cam profile	236

7.6	Radial cam with roller follower	236
7.6.1	Cam profile	240
7.7	Cam with offset roller follower	240
7.7.1	Cam profile	242
7.8	Cam with swinging roller follower	242
7.8.1	Cam profile	245
7.9	Cam with translational flat-faced follower	245
7.9.1	Displacement diagram	248
7.9.2	Cam profile	250
7.10	Cam with swinging flat-faced follower	251
7.11	Analytical methods	252
7.11.1	Tangent cam with roller follower	252
7.11.2	Graphical method for a tangent cam with roller follower	257
7.11.3	Circular arc cam operating flat-faced follower	259
7.12	Circular arc cam with roller follower	261
7.12.1	Roller follower on the flank	262
7.12.2	Roller follower on the nose	263
7.13	Radius of curvature and undercutting	267
7.13.1	Kloomok and Muffley method	267
7.13.2	Pressure angle	269
7.14	Cam size	270
	<i>Exercises</i>	271

Chapter 8 Governors

8.1	Introduction	275
8.2	Types of governors	275
8.3	Centrifugal governors	276
8.3.1	Simple Watt governor	276
8.3.2	Gravity loaded type governors	278
8.3.3	Spring loaded governors	283
8.3.4	Inertia governor	296
8.4	Performance of governors	297
8.4.1	Definitions	297
8.4.2	Effort and power of a Porter governor	298
8.4.3	Quality of a governor	300
8.4.4	Controlling force	300
	<i>Exercises</i>	306

Chapter 9 Inertia Force and Turning Moment

9.1	Introduction	311
9.2	Motion analysis of reciprocating mechanism	311
9.2.1	Velocity and acceleration of piston	312
9.2.2	Angular velocity and acceleration of connecting rod	313

9.3	Inertia forces in the reciprocating engine	314
9.3.1	Analytical method	314
9.3.2	Graphical method	316
9.4	Equilibrium of forces in slider-crank chain	318
9.5	Piston effort	319
9.6	Crank effort (or turning moment) diagrams	322
9.6.1	Procedure for determination of turning moment diagram	322
9.6.2	Turning moment diagram for a vertical steam engine	322
9.6.3	Turning moment diagram for a four stroke I.C. engine	323
9.6.4	Turning moment diagram for a multi-cylinder engine	323
9.6.5	Uses of turning moment diagram	324
9.7	Fluctuation of energy	324
9.7.1	Determination of maximum fluctuation of energy	324
9.8	Flywheel	325
9.8.1	Size of flywheel	325
9.8.2	Flywheel for a punching press	326
9.9	Equivalent dynamical system	339
	<i>Exercises</i>	344

Chapter 10 Balancing **351**

10.1	Introduction	351
10.2	Balancing of rotating masses	351
10.2.1	Single rotating mass	351
10.2.2	Many masses rotating in the same plane	353
10.2.3	Many masses rotating in different planes	356
10.2.4	Analytical method	358
10.3	Reciprocating masses	365
10.3.1	Reciprocating engine	365
10.3.2	Partial primary balance	367
10.4	Partial balancing of uncoupled locomotives	369
10.5	Coupled locomotives	377
10.6	Multi-cylinder in-line engines	386
10.6.1	Primary balancing	386
10.6.2	Secondary balancing	387
10.6.3	In-line two cylinder engine	390
10.6.4	In-line four cylinder four-stroke engine	391
10.7	Balancing of radial engines	393
10.7.1	Direct and reverse cranks method	393
10.8	Balancing of V-engines	396
	<i>Exercises</i>	399

Chapter 11 Gears **403**

11.1	Introduction	403
11.2	Types of gears	403
11.3	Terminology of gears	404

11.4	Fundamental law of gearing	408
11.5	Relative velocity between gear teeth	409
11.6	Euler Savary equation	410
11.7	Gear tooth forms	411
	11.7.1 Cycloidal tooth profile	412
	11.7.2 Involute tooth profile	412
	11.7.3 Comparison between involute and cycloidal tooth profiles	413
11.8	Construction of an involute	413
11.9	Involute function	414
11.10	Involutometry	415
11.11	Involute gear tooth action	416
11.12	Characteristics of involute action	418
11.13	Undercutting in involute gears	426
11.14	Minimum number of teeth	427
	11.14.1 Gear wheel	427
	11.14.2 Pinion	429
	11.14.3 Rack and Pinion	430
11.15	Gear standardization	432
11.16	Effect of centre distance variation on velocity ratio	433
11.17	Determination of backlash	433
11.18	Internal gears	437
11.19	Helical gears	438
	11.19.1 Parallel helical gears	442
	11.19.2 Crossed helical gears	443
	11.19.3 Herringbone gears	444
11.20	Bevel gears	445
11.21	Spiral gears	448
	11.21.1 Efficiency of spiral gears	449
11.22	Worm gears	451
	11.22.1 Efficiency of worm gears	453
	<i>Exercises</i>	455

Chapter 12 Gear Trains

12.1	Introduction	459
12.2	Types of gear trains	459
	12.2.1 Simple gear train	459
	12.2.2 Compound gear train	460
	12.2.3 Reverted gear train	461
	12.2.4 Planetary gear trains	461
12.3	Sun and planet gears	463
12.4	Epi-cyclics with two inputs	464
12.5	Compound epicyclic gear train	465
12.6	Epicyclic bevel gear trains	465
12.7	Torques in epicyclic gear trains	465
	<i>Exercises</i>	486

Chapter 13 Static and Dynamic Force Analysis 495

13.1	Inertia forces in mechanisms	495
13.2	Static force analysis	495
13.2.1	Slider crank mechanism	495
13.2.2	Four-bar mechanism	496
13.2.3	Shaper mechanism	498
13.3	Inertial force analysis	500
13.3.1	Inertia force in a four-bar mechanism	500
13.4	Combined static and dynamic force analysis	504
13.4.1	Slider--crank mechanism	504
13.4.2	Shaper mechanism	505
	<i>Exercises</i>	513

Chapter 14 Gyroscopic and Precessional Motion 517

14.1	Introduction	517
14.2	Precessional motion	517
14.3	Definitions	519
14.4	Gyroscopic couple of a plane disc	519
14.5	Gyroscopic couple on an aeroplane	523
14.6	Gyroscopic effects on a naval ship	524
14.6.1	Ship stabilization	527
14.7	Stability of a four-wheel vehicle taking a turn	527
14.8	Stability of a two-wheel vehicle taking a turn	532
14.9	Effect of precession on a disc fixed rigidly at a certain angle to a rotating shaft	534
14.10	Gyroscopic analysis of grinding mill	541
	<i>Exercises</i>	543

Appendix A-1 Machine Theory Laboratory Practice 547

Appendix A-2 Glossary Of Terms 567

Appendix A-3 Multiple Choice Questions 581

Answers 624
