

CONTENTS

1. **General introduction** 01-18
1. Manufacturing processes, 1 ; 2. Classification of manufacturing processes, 1 ; 3. Types of production system, 3 ; 4. Plant layout, 3 ; 5. Objective of plant layout, 3 ; 6. Types of layout, 4 ; 7. Manufacturing and basic definitions, 10 ; 8. Automation, mechanization, CAD, CAM and CIM, 11 ; 9. Industrial safety, 12 ; 10. Factories act and accidents, 16.
2. **Fundamental of metals and alloys** 19-40
1. Introduction, 19 ; 2. Atom, 19 ; 3. Structure of solids, 20 ; 4. Formation of grains, 23 ; 5. Imperfections in crystals, 25 ; 6. Deformation of metals, 26 ; 7. Property changes by deformation, 29 ; 8. Recovery, recrystallization and grain growth, 30 ; 9. Fracture, 32 ; 10. Metal alloys, 33 ; 11. Solidification of an alloy, 33 ; 12. Equilibrium diagrams, 36 ; 13. Iron-carbon equilibrium diagram, 37.
3. **Properties, testing and inspection of metals** 41-60
1. Introduction, 41 ; 2. Stress and strain, 41 ; 3. Mechanical properties, 42 ; 4. Testing of metals, 47 ; DESTRUCTIVE TESTING, 47 ; 5. Tensile testing, 47 ; 6. Compression test, 50 ; 7. Hardness tests, 50 ; 8. Impact testing, 54 ; 9. Fatigue testing, 55 ; 10. Creep and stress rupture testing, 56 ; 11. Nondestructive testing, 57.
4. **Ferrous metals and alloys** 61-102
1. Introduction, 61 ; 2. Pig iron, 61 ; 3. Modern development, 63 ; 4. Cast iron, 64 ; 5. Wrought iron, 70 ; 6. Effect of chemical elements on iron, 73 ; 7. Steels, 74 ; 8. Steel making processes, 75 ; 9. The Bessemer process, 75 ; 10. The L-D process, 76 ; 11. The open hearth process, 77 ; 12. The crucible process, 79 ; 13. The electric furnace process, 79 ; 14. Duplex processes, 82 ; 15. Classification of steels, 82 ; 16. Applications of carbon steels, 84 ; 17. Influence of the constituents on steel, 84 ; 18. Bright steels, 86 ; 19. Free cutting steels, 86 ; 20. Alloy steel, 87 ; 21. Classification of alloy steels, 88 ; 22. Special alloy steels, 90 ; 23. Cutting alloys, 94 ; 24. Coding of iron and steel, 95 ; 25. Comparison of Indian and overseas standards, 101 ; 26. Classification of steels by SAE and AISI, 101.

(x) ELEMENTS OF WORKSHOP TECHNOLOGY

5. **Nonferrous metals and alloys** 103–118
1. Introduction, 103 ; 2. Aluminium and its alloys, 103 ; 3. Copper and its alloys, 105 ; 4. Lead and its alloys, 107 ; 5. Tin, 108 ; 6. Bearing metals, 108 ; 7. Copper-tin-antimony alloy, 109 ; 8. Copper-tin alloy, 109 ; 9. Zinc and its alloys, 111 ; 10. Copper-zinc alloy, 111 ; 11. Nickel and its alloys, 112 ; 12. Alloys for high temperature service, 115 ; 13. Metals for nuclear energy, 115.
6. **Heat treatment of metals and alloys** 119–152
1. Introduction, 119 ; 2. Cooling curve for pure iron, 119 ; 3. Inverse-rate curves for steel, 120 ; 4. Transformation in steel, 121 ; 5. Purposes and methods of heat treatment, 125 ; 6. Annealing, 126 ; 7. Normalizing, 130 ; 8. Hardening, 131 ; 9. Martempering, 132 ; 10. Austempering, 133 ; 11. Hardenability, 133 ; 12. Tempering, 135 ; 13. Case hardening : carburising, 137 ; 14. Cyaniding, 138 ; 15. Nitriding, 139 ; 16. Induction hardening, 139 ; 17. Flame hardening, 140 ; 18. Diffusion coating, 140 ; 19. Heat treatment of aluminium, 140 ; 20. Heat-treatment of cutting tools, 143 ; 21. Heat-treating furnaces, 144 ; 22. Hearth furnaces, 145 ; 23. Bath furnaces, 146 ; 24. Furnace temperatures, 148.
7. **Mechanical working of metals** 153–170
1. Introduction, 153 ; 2. Hot working, 153 ; 3. Hot rolling, 154 ; 4. Piercing or seamless tubing, 157 ; 5. Drawing, 157 ; 6. Deep Drawing, 158 ; 7. Hot spinning, 158 ; 8. Extrusion, 159 ; 9. Cold-working, 161 ; 10. Cold-rolling, 162 ; 11. Cold-drawing, 162 ; 12. Cold-bending, 164 ; 13. Cold-spinning, 165 ; 14. Cold-extrusion, 166 ; 15. Squeezing, 166 ; 16. Peening, 167 ; 17. Sizing, coining and hobbing, 167 ; 18. Electro-hydraulic forming, 168 ; 19. Metallurgical aspects, 169.
8. **Smithing and forging** 171–210
1. Introduction, 171 ; 2. Forging materials, 171 ; 3. Heating devices, 172 ; 4. Forging temperatures, 175 ; 5. Hand tools and appliances, 177 ; 6. Smith forging operations, 179 ; 7. Smith forging examples, 183 ; 8. Forging processes, 187 ; 9. Hand forging, 188 ; 10. Power forging, 189 ; 11. Impression-die forging, 193 ; 12. Drop hammers, 196 ; 13. Press forging, 197 ; 14. Roll die forging, 199 ; 15. Press vs. hammer forging, 200 ; 16. Machine or upset forging, 201 ; 17. High energy-rate forging (HERF), 202 ; 18. Fibrous structure of forgings : grain-flow, 203 ; 19. Effects of forging : forged parts vs. cast

parts, 204 ; 20. Defects in forging, 205 ; 21. Heat treatment of forged parts, 206 ; 22. Design considerations, 207 ; 23. Advantages and limitations, 208.

- 9. Welding and related processes 211–268**
1. Introduction, 211 ; 2. Weldability, 211 ; 3. Types of welding, 213 ; 4. Metallurgy of weld, 213 GAS WELDING, 215 ; 5. Oxy-acetylene welding, 215 ; 6. Air-acetylene welding, 223 ; 7. Oxy-hydrogen welding, 224 ; ARC WELDING, 224 ; 8. Metal transfer in arc welding, 226 ; 9. Arc welding equipment, 227 ; 10. Arc welding methods, 233 ; RESISTANCE WELDING, 241 ; 11. Resistance welding methods, 242 ; 12. Thermit welding, 246 ; SOLID STATE WELDING, 247 ; 13. Solid-state welding methods, 247 ; NEWER WELDING METHODS, 250 ; 14. Newer types of welding (Electron beam welding, laser-beam welding), 250 ; RELATED PROCESSES, 252 ; 15. Oxygen cutting, 252 ; 16. Hard facing, 255 ; 17. Bronze welding, 256 ; 18. Soldering, 256 ; 19. Brazing, 258 ; 20. Welding of various metals, 258 ; 21. Inspection and testing of welds, 261 ; 22. Welded joints and edge preparation, 262 ; 23. Welding of pipes, 264 ; 24. Representation of welds (Indian Standard), 266.
- 10. Wood and wood working 269–306**
1. Introduction, 269 ; 2. Structure of wood, 269 ; 3. Grain in wood, 270 ; 4. Seasoning of wood, 271 ; 5. Common defects in timber, 271 ; 6. Classification and Conversion of wood, 273 ; 7. Common varieties of Indian timber, 274 ; 8. Carpentry tools, 275 ; 9. Marking and measuring tools, 275 ; 10. Cutting tools, 277 ; 11. Planes, 281 ; 12. Boring tools, 283 ; 13. Striking tools, 285 ; 14. Holding tools, 286 ; 15. Miscellaneous tools, 287 ; 16. Setting and sharpening of tools, 289 ; 17. Carpentry processes, 290 ; 18. Marking, 291 ; 19. Sawing, 291 ; 20. Planing, 292 ; 21. Chiselling, 292 ; 22. Boring, 293 ; 23. Grooving, 293 ; 24. Rebating, 293 ; 25. Moulding, 294 ; 26. Carpentry joints, 294 ; 27. Woodworking machines, 298 ; 28. Plywood and veneer manufacturing, 302 ; 29. Auxiliary materials used in carpentry, 304.

(xii) ELEMENTS OF WORKSHOP TECHNOLOGY

11. Patternmaking and foundry

307-430

1. Introduction, 307 ; 2. Pattern materials, 307 ; 3. Patternmaking tools, 311 ; 4. Types of patterns, 312 ; 5. Patternmaking allowances, 320 ; 6. Methods of constructing patterns, 322 ; 7. Other technological considerations, 326 ; 8. Coreprints, 328 ; 9. Core boxes, 329 ; 10. Colour coding for patterns and core boxes, 331 ; FOUNDRY, 332 ; 11. Moulding tools and equipment, 332 ; 12. Moulding sands, 337 ; 13. Types of moulding sand, 341 ; 14. Grain shape and size of sand, 342 ; 15. Sand additives, 343 ; 16. Properties of moulding sand, 345 ; 17. Sand preparation, 346 ; 18. Sand testing, 348 ; 19. Moulding processes, 352 ; 20. Moulding processes based on sand used, 352 ; 21. Making a green-sand mould, 357 ; 22. Typical moulding problems, 359 ; 23. Moulding processes based on the methods used, 362 ; 24. Machine moulding, 364 ; 25. Cores and core making, 368 ; 26. Special moulding processes, 374 ; CO₂ moulding, Ferro-silicon moulding, Dicalcium silicate moulding, Cement-sand moulding, Shell moulding, Hot- and cold-box moulding, Investment mould-process, Plaster moulding, Ceramic moulding, 27. Permanent mould casting, 386 ; Slush casting, Die casting, Centrifugal casting, Continuous casting, 28. Gating and risering of castings, 392 ; 29. Risering of castings, 400 ; 30. Use of padding and chills, 402 ; 31. Melting furnaces for ferrous metals : Cupola, 403 ; 32. Melting furnaces for nonferrous metals, 414 ; 33. Ladles, 416 ; 34. Pouring the metal, 417 ; 35. Cleaning of castings, 418 ; 36. Defects in castings, 419 ; 37. Inspection and quality control, 422 ; 38. Modernization and mechanization of foundries, 423 ; 39. Design of casting, 425.

12. Powder metallurgy

431-440

1. Introduction, 431 ; 2. Process description, 431 ; 3. Manufacture of metal powders, 432 ; 4. Blending of powders, 433 ; 5. Compacting, 434 ; 6. Presintering, 434 ; 7. Sintering, 434 ; 8. Secondary operations, 435 ; 9. Isostatic pressing, 436 ; 10. Metal injection moulding, 437 ; 11. Products of powder metallurgy, 437 ; 12. Advantages of the process, 439 ; 13. Disadvantages and limitations, 439 ; 14. Design consideration, 440 ;

13. Plastics and their processings

441-458

1. Introduction, 441 ; 2. Types of plastics, 441 ; 3. Elastomers, 446 ; 4. Materials for processing plastics, 446 ; PROCESSING PLASTICS, 447 ; 5. Moulding processes, 448 ; 6. Calendering, 452 ; 7. Thermoforming, 452 ; 8. Casting,

- 454 ; 9. Laminating and reinforcing, 454 ; 10. Foamed plastics, 455 ; 11. Fastening machining plastics, 455 ; 12. Design considerations, 457.
- 14 Bench work and fitting 459-494**
 1. Introduction, 459 ; 2. Vices, 460 ; 3. Hammers, 462 ; 4. Chisels, 464 ; 5. Chipping, 467 ; 6. Files, 468 ; 7. Filing, 471 ; 8. Scraper, 474 ; 9. Scraping, 475 ; 10. Grinding and polishing, 476 ; 11. Hacksaw, 477 ; 12. Sawing, 480 ; 13. Marking tools, 481 ; 14. Surface plate, 481 ; 15. Scriber, 481 ; 16. Punch, 482 ; 17. V-block, 482 ; 18. Angle plate, 483 ; 19. Try-square, 483 ; 20. Marking out, 484 ; 21. Drill, 485 ; 22. Drilling, 486 ; 23. Reamer, 487 ; 24. Reaming, 488 ; 25. Taps, 489 ; 26. Tap drill size, 490 ; 27. Tapping, 491 ; 28. Dies and stock, 492 ; 29. Dieing, 493.
- 15. Limits, fits and surface quality 495-518**
 1. Introduction, 495 ; 2. Interchangeability, 495 ; 3. Elements of interchangeable system, 496 ; 4. Fits, allowances, clearances and interferences, 499 ; 5. Types of fits, 500 ; 6. Hole basis and shaft basis, 502 ; 7. Geometric dimensioning and tolerances, 503 ; 8. Limit systems, 504 ; 9. The Indian Standard system, 504 ; 10. Selective assembly, 511 ; SURFACE QUALITY, 512 ; 11. Surface characteristics, 512 ; 12. Evaluation of surface finish, 513 ; 13. Symbols of drawings, 517.
- 16. Measurement and inspection 519-568**
 1. Introduction, 519 ; 2. Standards of measurement, 519 ; 3. Classification of measuring instruments, 521 ; 4. Linear measurement (nonprecision), 522 ; 5. Linear measurement (precision), 526 ; 6. Comparators, 539 ; 7. Measuring machines, 545 ; 8. Angular measurement, 545 ; 9. Taper measurement, 554 ; 10. Surface measurement, 555 ; 11. Use of LASER, 559 ; 12. Gauges, 560.
- 17. Surface coating of metals 569-590**
 1. Introduction, 569 ; CLEANING OF METALS, 569 ; 2. Chemical cleaning, 570 ; 3. Mechanical cleaning, 573 ; FINISHES OF METALS, 576 ; 4. Metallic coatings, 576 ; 5. Plastic coating, 583 ; 6. Organic finishes, 585 ; 7. Inorganic coatings, 588 ; 8. Electroless plating, 589.

(xiv) ELEMENTS OF WORKSHOP TECHNOLOGY

18. Sheet metal work	591-608
1. Introduction, 591 ; 2. Metals used in sheet metal work, 591 ; 3. Sheet metal hand tools, 593 ; 4. Sheet metal operations, 597 ; 5. Sheet metal joints : Hems and seams, 601 ; 6. Sheet metal allowance, 601 ; 7. Sheet metal working machines, 603 ; 8. Laying out a pattern, 604.	
19. Plumbing, threading fasteners and joints	609-622
1. Plumbing, 609 ; 2. Specification of pipes, 609 ; 3. Material used for pipes, 609 ; 4. Pipe fitting and joints, 610 ; 5. Taps and valves, 611 ; 6. Plumber's tools, 612 ; 7. Threaded fasteners, 613 ; 8. Screw threads and their uses, 614 ; 9. Indian Standard threads, 615 ; 10. Cap screws and machine screws, 616 ; 11. Set screws, 617 ; 12. Methods of producing screw threads, 617 ; 13. Bolts, 617 ; 14. Studs, 618 ; 15. Forms of nuts, 618 ; 16. Reveting joints, 620.	
20. Quality control	623-642
1. Introduction, 623 ; 2. Inspection and quality control, 623 ; 3. Statistical quality control, 624 ; 4. Fundamental of statistics, 625 ; 5. Control charts, 629 ; 6. Control charts for variables, 630 ; 7. Control charts for attributes, 634 ; 8. Control charts for defects, 637 ; 9. Application of control charts, 639 ; 10. Sampling inspection, 639.	
21. Ceramic and glass processing	643-656
1. Introduction, 643 ; 2. Classification of ceramics, 643 ; 3. Properties of ceramics, 645 ; 4. Processing of traditional ceramics, 645 ; 5. Glass, 650 ; 6. Structure and properties of glass, 650 ; 7. Processing of glass, 651 ; 8. Cement, 637 ; 9. Concrete, 655 ;	
22 Introduction to machine tools	657-670
Appendix	A1-A4
Index	11-18
