xvi LIST OF SYMBOLS

$\theta$	Dimensionless parameter
$\xi$	Average depth of penetration
$\Delta H_f$	Enthalpy of formation
$\Delta H_c$	Enthalpy of combustion
$\Delta U_R$	Internal energy of reaction
	Superscript 'o' refers to standard state

# CONTENTS

	<i>Foreword</i>	vii
	<i>Preface</i>	ix
	<i>Acknowledgements</i>	xi
	<i>List of Principal Symbols</i>	xiii
<b>1</b>	<b>Energy Sources</b>	<b>1</b>
1.1	Introduction	1
1.2	Energy Sources of Present and Future	2
1.3	Exhaustible Sources	3
1.4	Inexhaustible Sources	6
	Hydraulic power 6; Solar energy 7; Wind power 8; Energy from oceans 8; Tidal power 8; Ocean thermal energy conversion 9; Geothermal power 9; Energy from waste 10; Bio-gas 11; Synthetic fuels: Some alternatives to gasoline 11	
	<i>References</i>	14
<b>2</b>	<b>Solid Fuels</b>	<b>15</b>
2.1	Origin of Coal	15
	Genesis of coal 16; Formation of peat from wood 16; Formation of coal from peat 17	
2.2	Analysis of Coal	17
	Proximate analysis 18; Ultimate analysis 19	
2.3	Some Other Tests	19
	Calorific value 19; Swelling or caking test 21; Ash fusibility test 21; Agglutinating Index 22; Grindability Index 22	
2.4	Coal Petrology	22
	Recent petrological terminology 22	
2.5	Classification of Coal	24
	Methods based on ultimate analysis 25; Seyler's classification 25; Methods based on proximate analysis 25; ASTM classification 27; NCB classification 29; ECE or International classification 29	
2.6	Other Solid Fuels	32
	Wood 32; Wood charcoal 32; Coke 33; Fuel briquettes 34	

<b>3 Liquid Fuels</b>	<b>35</b>	<b>6 Fundamentals of Chemical Kinetics</b>	<b>77</b>
3.1 Origin of Petroleum	35	6.1 Rate of Reaction	78
3.2 Chemistry of Petroleum	35	6.2 Reaction Order and Molecularity	78
Normal paraffins 36; Iso-paraffins 36; Olefins 36; Naphthenes 37; Aromatics 38		Unimolecular reactions 81; Second order reactions 82; Third order reactions 86; Fractional-order and higher-order reactions 89	
3.3 Refining of Petroleum	39	6.3 Complex Reactions	89
Fractional distillation 39; Cracking 41; Vacuum distillation process 41; Visbreaking 41; Reforming process 42; Thermal reforming 42; Plate-forming 42		Reversible reactions 93; Parallel reactions 96; Consecutive reactions 98	
3.4 Other Conversion Processes	43	6.4 Chain Reactions	99
Polymerization 43; Alkylation 43; Isomerization 43; Absorption process 44		Kinetics of chain reactions 101; Unbranched chain reactions 102; Branched chain reactions 104; Degenerate branching 104	
3.5 Properties and Tests for Petroleum Products	44	6.5 Theories of Reaction Kinetics	106
Gravity 44; Viscosity 44; Flash point and fire point 45; Calorific value 45; Reid vapour pressure 46; Cloud and pour points 46; Aniline point and diesel index 46; Gum in motor fuel and oxygen stability 47; Sulphur 46; Water and sediments 48; Carbon residue 48; Ash content 49; Colour 49; Distillation 49; Knock characteristics of motor fuels 49		The Arrhenius equation 106; Activation energy 108; Collision theory 111; Activated complex theory 115; The equilibrium hypothesis 115; The rate equation 116; Thermodynamic formulation of reaction rates 118	
3.6 Various Petroleum Products	50	<i>References</i>	120
Motor gasoline 50; Aviation gasoline 51; Aviation turbine fuels 51; Kerosene 52; Diesel fuels 52; Fuel oils 52; Oil shales 54			
<b>4 Gaseous Fuels</b>	<b>55</b>	<b>7 Kinetics of Chemical Chain Reactions</b>	<b>121</b>
4.1 Natural Gases	55	7.1 Reaction of Bromine with Hydrogen	121
Natural gas from petroleum deposits 55; Natural gas from coal mines 56		7.2 Reaction of Hydrogen with Oxygen	124
4.2 Manufactured Gases	56	Explosion limits 124; Hydrogen-oxygen reaction mechanism 127	
Liquefied petroleum gas 56; Refinery oil gas 57; Wood gas 57; Peat gas 57; Coal gas (town gas) 57; Coke oven gas 58; Producer gas 58; Blast furnace gas 60; Blue water gas (BWG) 61; Carburetted water gas (CWG) 61; Bio-gas 62		7.3 Carbon Monoxide-Oxygen Reactions	132
4.3 Properties and Testing of Fuel Gases	62	7.4 Water Catalyzed Carbon Monoxide-Oxygen Reaction	135
Specific gravity or density 62; Calorific value 63; Analysis of fuel gas 63; Spectrometry 64; Gas chromatography 64		7.5 Hydrocarbon Oxidation	137
<b>5 Introduction to the Combustion of Fuels</b>	<b>65</b>	7.6 Mechanism of Hydrocarbon Combustion	143
5.1 General Considerations	65	<i>References</i>	147
5.2 Combustion Stoichiometry	66	<b>8 Thermodynamics of Combustion</b>	<b>148</b>
Theoretical air required for complete combustion 67; Conversion of gravimetric analysis to volumetric analysis and vice versa 68; Calculation of the minimum amount of air for a fuel of known composition 68; Calculation of the composition of dry flue gases if fuel composition is known 70; Calculation of the composition of fuel and excess air supplied from exhaust gas analysis 71		8.1 Combustion Process and the First Law	149
5.3 Dewpoint of Products	72	8.2 Energy Balance of Chemical Reactions	150
5.4 Flue Gas Analysis	72	Internal energy of reaction 150; Enthalpy of combustion 151; Enthalpy of formation 155; Bond energies 158; Average bond dissociation energies 159	
		8.3 Adiabatic Flame Temperature	160
		8.4 Equilibrium Composition of Gaseous Mixtures	164
		Definition 164; The equilibrium composition of a single chemical species 164; The equilibrium composition of a mixture of reacting species 165; The law of mass action 165; Equilibrium criteria 168; Relationship between Gibbs function and equilibrium constant 170	
		8.5 Calculation of Equilibrium Composition and Temperature	172
		Constant pressure combustion 173; Mass conservation (Four equations) 173; Chemical equilibrium (Six equations) 174; Constant volume combustion 174	
		<i>References</i>	179

**9 Laminar Flame Propagation**

- 9.1 Premixed Flames 180
- 9.2 The Structure of a Laminar Flame  
Temperature profile 182; Concentration profile 185; The  
bunsen flame 186; Flames in tubes 189
- 9.3 Theories of Laminar Flame Propagation  
Thermal theories 193; Semenov equation 194; Diffusion  
theories 198; Transford-Pease equation 199;  
*References* 200

**10 Determination of Burning Velocities**

- 10.1 Definition of Burning Velocity 205
- 10.2 Methods of Observing Flame Front 206
- 10.3 Methods of Measuring Burning Velocity  
Flat flame burner method 208; Circular tube, nozzle and slot  
burner methods 221; Cylindrical tube method 217; Constant pressure  
bomb method (soap bubble technique) 220; Constant volume  
bomb method 222; Double flame-kernel method 228; Flame  
thrust method 232
- 10.4 Comparison of Burning Velocities 232
- 10.5 Factors Affecting Burning Velocity  
Temperature dependence of burning velocity 234; Pressure  
dependence of burning velocity 236; Effect of electric field 239;  
Effect of mixture composition 240; Effect of admixtures 241;  
Effect of fuel structure 245  
*References* 250

**11 Turbulent Flame Propagation**

- 11.1 Turbulent Burning Velocity 252
- 11.2 Factors Affecting Turbulent Burning Velocity  
Effect of fuel concentration 255; Effect of fuel type 256;  
Effect of initial temperature 256; Effect of pressure 257
- 11.3 Concept of Turbulent Flow  
Structure of turbulence 260; Effect of flow velocity and turbulence  
on turbulent burning velocity 261
- 11.4 Structure of a Turbulent Flame 264
- 11.5 Turbulent Flame Theories  
*References* 265

**12 Flame Stability**

- 12.1 Flame Stabilization on Open Burners 284
- 12.2 Characteristic Stability Diagram 285
- 12.3 Mechanism of Flame Stabilization 286
- 12.4 Flame Stretch Theory 291
- 12.5 Flames Supported by Inserting a Solid Object  
in a Gas Stream 295

- 12.6 Flame Stabilization by Eddies 297
- 12.7 Quenching Distance, Penetration Distance and  
Dead Space  
*References* 298

**13 Diffusion Flames**

- 13.1 Gaseous Diffusion Flames 300
- 13.2 Theory of Diffusion Flames 305
- 13.3 Theory of Turbulent Diffusion Flames 312
- 13.4 Confined Diffusion Jet Flames  
*References* 314

**14 Detonation Waves in Gases**

- 14.1 Shock Wave 320
- 14.2 Detonation Wave 320
- 14.3 Calculation of Detonation Velocity 325
- 14.4 Initiation of Detonation  
*References* 331

**15 Ignition**

- 15.1 The Process of Self-Ignition 338
- 15.2 The Induction Period or Delay of Ignition 339
- 15.3 The Limits of Self-Ignition 343
- 15.4 Forced Ignition 344
- Ignition by pilot flames 351; Ignition by hot gases 351;  
Ignition by shock waves 351; Ignition by spark 352
- 15.5 Factors Affecting Ignition Energy 347
- Effect of mixture composition 356; Effect of electrode type 357;  
Effect of pressure 360; Effect of temperature 361; Effect of  
dilutents 361; Effect of mixture velocity and turbulence 363;  
Spark duration 364  
*References* 365

**16 Combustion of Liquid and Solid Fuels**

- 16.1 Combustion of Liquid Fuels 366
- 16.2 Combustion of a Fuel Droplet 367
- Comparison between observed and calculated results 375;  
Effect of pressure and flame radius on burning rate 375
- 16.3 Shape of Flame Surface during Burning of a  
Droplet with Natural Convection 376
- 16.4 Droplet Interference during Burning 377
- 16.5 Diffusion Flames in Spray Combustion 378
- 16.6 Combustion of Solid Fuels 380
- 16.7 Combustion of Coal 380
- Oxidation mechanism of carbon 381

<i>Appendix B: Calculation of Equilibrium Constant and Total Internal Energy</i>	471
<i>Appendix C: Computer Flow Chart</i>	472
<i>Appendix D: Some Questions and Problems</i>	473
<i>Select Bibliography</i>	491
<i>Index</i>	495

## xxiii CONTENTS

16.8	Kinetics of Heterogeneous Reaction	383
16.9	The Transfer Number in Heterogeneous Combustion Transfer number of liquid fuels 387; Transfer number of solid fuels 388; Liquid and solid fuels as one family 389; Combustion of carbon 390; Combustion of metals 390	386
16.10	Burning Time of Fuel Particles	390
	<i>References</i>	394
<b>17</b>	<b>Combustion Applications</b>	396
17.1	Coal Burning Equipment Over feed stokers 397; Travelling-grate or chain-grate stoker 398; Under feed or retort stokers 399; Pulverized coal burners 400; Cyclone furnace 401	397
17.2	Oil Burners Vaporizing burners 403; Rotary-cup burners 403; Mechanical or oil pressure atomizing burners 404; Steam or high pressure air atomizing burners 405	402
17.3	Gas Burners	407
17.4	Combustion in I.C. Engines	410
17.5	Combustion in S.I. engines 410; Combustion in C.I. engines 412	413
17.6	Combustion in Gas Turbines and Jet Engines Fuel injection 415 Rocket Engines	415
<b>18</b>	<b>Air Pollution</b>	417
18.1	Types of Air Pollution Grit and dust 418; Smoke 418; Gaseous pollutants 418	417
18.2	Combustion Generated Air Pollution	418
18.3	Effects of Air Pollution	419
18.4	Pollution from Combustion of Fossil Fuels and its Control Grit and dust 420; Smoke 421; Sulphur dioxide 422; Carbon monoxide 422	420
18.5	Pollution from Automobiles and its Control Evaporative emission 423; Crankcase emission 424; Exhaust emission 425; Effect of control means on exhaust pollutants 426; Effect of air/fuel mixture 426; Improved mixture quality 427; Inlet air heating 427; Spark retard 427; Surface to volume ratio 428; Compression ratio 428; Valve overlap 428; Advanced control system 428; Thermal reactors 429; Catalytic exhaust reactors 429; Reducing reactors 429; Exhaust gas recirculation (EGR) 430; Heterogeneous combustion 430	423
18.6	Emission by Diesel Engines	430
18.7	Emission Standards	431
	<b>Appendices</b>	433
	<i>Appendix A</i>	435
