

PART I

NATURE, SCOPE AND METHODOLOGY OF BUSINESS ECONOMICS

1. NATURE AND SCOPE OF BUSINESS ECONOMICS 3-20

What Business Economics is About? Business Economics and Economic Theory—Business Economics and Decision Sciences—The Nature and Types of Business Decisions—Managerial Decision Making Process—Micro and Macro-Economics—Role of Business in Society—Social Responsibility of Business—Social Responsibility and Value Maximisation Model of the Firm. Questions for Review.

2. BASIC PROBLEMS OF AN ECONOMY AND ROLE OF PRICE

MECHANISM

21-39

The Economic Problem—Basic problems of an Economy—What to Produce—How to Produce—For Whom to Produce—What Provision should be made for Economic Growth—What, How and For Whom : Subject Matter of Micro-economics—Macroeconomics : Whether resources are fully utilised? How are Basic Problems solved : Price Mechanism Vs Planning—A Free Market Economy—Role of Price Mechanism : Functioning of a Free Market Economy—Solving all the problems simultaneously—Critical Evaluation of the Working of Price Mechanism—Questions for Review.

PART II

DEMAND ANALYSIS AND CONSUMER BEHAVIOUR

3. DEMAND AND LAW OF DEMAND 40-52

The Meaning of Demand—Demand and Utility—Demand Function—The Law of Demand—Reasons for the Law of Demand: Why Does Demand Curve Slope Downward? Exceptions to the Law of Demand—Market Demand Function—Market Demand Curve—Demand and Quantity Demanded—Extension and Contraction in Demand—Factors Determining Market Demand—Shifts in Demand: Increase and Decrease in Demand—Consumer Sovereignty—Questions for Review.

4. CONSUMER'S BEHAVIOUR: CARDINAL UTILITY THEORY 53-69

Introduction—The Meaning of Utility—Total and Marginal Utility— Assumptions of Marshall's Cardinal Utility Analysis—Law of Diminishing Marginal Utility—Applications and Uses of Diminishing Marginal Utility—Principle of Equi-Marginal Utility: Consumer's Equilibrium—Derivation of Demand Curve from Law of Diminishing Marginal Utility—Derivation of Law of Demand: Multi-Commodity Model—Limitations of the Law of Equi-Marginal Utility—Critical Evaluation of Marshall's Cardinal Utility Analysis—Questions for Review.

- 5. INDIFFERENCE CURVE ANALYSIS OF DEMAND 70-111**
 Indifference Curve Approach—What Are Indifference Curves?—Marginal Rate of Substitution—Properties of Indifference Curves—Indifference Curves of Perfect Substitutes and Perfect Complements—Budget Line—Consumer's Equilibrium: Maximising Satisfaction—Income Consumption Curve and Engel Curve—Substitution Effect—Price Effect: Price Consumption Curve—Decomposing Price Effect into Income Effect and Substitution Effect—Price-Demand Relationship: Deriving Law of Demand—Derivation of Individual's Demand Curve from Indifference Curve Analysis—Superiority of Indifference Curve Analysis—Critique of Indifference Curve Analysis—Questions for Review.
- 6. REVEALED PREFERENCE THEORY OF DEMAND 112-118**
 Preference Hypothesis and Strong Ordering—Deriving Law of Demand from Revealed Preference Hypothesis—Critical Appraisal of Revealed Preference Theory—Questions for Review.
- 7. CONSUMER SURPLUS 119-132**
 Meaning of Consumer Surplus—Marshall's Measure of Consumer Surplus—Consumer Surplus and Gain from a Change in Price—Measurement of Consumer's Surplus through Indifference Curves—Critical Evaluation of the Concept of Consumer's Surplus—Uses and Applications of Consumer Surplus—Use of Consumer Surplus in Cost-Benefit Analysis—Questions for Review.
- 8. ELASTICITY OF DEMAND 133-158**
 Various Concepts of Demand Elasticity—Price Elasticity of Demand—Perfectly Inelastic and Perfectly Elastic Demand—Measurement of Price Elasticity of Demand—Measurement of Price Elasticity of Demand at a Point on the Demand Curve—Comparing Price Elasticity of Two Demand Curves—Determinants of Price Elasticity of Demand—Importance of the Price Elasticity of Demand—Cross Elasticity of Demand—Importance of Cross Elasticity of Demand for Business Decision-Making—Income Elasticity of Demand—Importance of Income Elasticity for Business Firm—Questions and Problems for Review.
- 9. DEMAND FORECASTING 159-169**
 Demand Forecasting: Meaning, Need and Importance—Methods of Demand Forecasting: Consumer Survey Method: Expert Opinion Method: Survey of Sales Forces: Market Experiments: Time Series Analysis—Econometric Method—Questions and Problems for Review.
- PART III**
- ANALYSIS OF PRODUCTION AND COST**
- 10. PRODUCTION ANALYSIS : FACTORS OF PRODUCTION 173-190**
 Factors of Production: Meaning—Classification of Factors of Production—Land—Characteristics of Land—Capital: Physical and Human—Meaning of Capital—Role of Capital—Labour—Division of Labour—Division of Labour and Size of Market—Efficiency of Labour—Entrepreneurs—Theories of Population: Malthus' Theory of Population—Critique of Malthus Theory of Population—Optimum Theory of Population—Limitations of the Concept of Optimum Population.

- 11. THEORY OF PRODUCTION : RETURNS TO A FACTOR** 191-202
 Production Function: Transforming Inputs into Output—Concepts of Product: Total, Average and Marginal Products—Law of Variable Proportions—Three Stages of the Law of Variable Proportions—Applicability of the Law of Diminishing Returns—Significance of the Law of Diminishing Returns—Questions for Review.
- 12. PRODUCTION FUNCTION WITH TWO VARIABLE INPUTS** 203-221
 Isoquants—Marginal Rate of Technical Substitution—General Properties of Isoquants—Isoquants of Perfect Substitutes and Complements—Fixed Proportion and Variable Proportion Production Function—Linear Homogeneous Production Function—Returns to Scale—Constant Returns to Scale—Increasing Returns to Scale—Decreasing Returns to Scale—Production Function with Varying Returns to Scale—Importance of Nature of Returns to Scale—The Economic Region of Production—Questions and Problems for Review.
- 13. OPTIMUM FACTOR COMBINATION** 222-231
 Iso-Cost Line—Shifts in Iso-Cost Line—Least-Cost Combination of Factors: Choice of Inputs—Output Maximisation for a Given Level of Outlay (i.e., Cost)—Expansion Path—Factor Substitution and Changes in Factor Prices—Questions and Problems for Review.
- 14. COST ANALYSIS** 232-259
 The Concepts of Cost: Accounting Costs and Economic Costs, Opportunity Cost—Short-Run and Long-Run Defined—Short-Run Costs: Total Fixed and Variable Costs—The Short-run Average Cost Curves—Average Fixed Cost—Average Variable Cost—Relationship Between AVC and Average Product—Average Total Cost (ATC)—Marginal Cost (MC)—The Relationship Between Marginal Cost and Marginal Product of a Variable Factor—The Relationship Between the Average and Marginal Cost Curves—Long-Run Average Cost Curve—Why Long-Run Average Cost Curve is of U-Shape? Long-Run Average Cost Curve in Case of Constant Returns to Scale—The Concept of Optimum Firm—Internal Economies and Diseconomies—Questions and Problems for Review.
- 15. BREAK-EVEN ANALYSIS** 260-267
 Introduction—Linear Break-Even Analysis : Graphic Method—Analysis of Break-Even Point in Case of Non Linear Total Revenue and Cost Curves—Linear Break-Even Analysis : Algebraic Method—A Numerical Example of Break - Even Analysis—Linear Break-even Analysis : Changes in Break-even Output—Operating Leverage—Limitations of Break-even Analysis—Questions and Problems for Review.
- 16. SUPPLY AND ITS ELASTICITY** 268-278
 The Meaning of Supply—Supply Schedule, Supply Curve and Law of Supply—Law of Supply—Why does Supply Curve Generally Slope Upward to the Right?—Supply and Quantity Supplied—Changes in Supply : Increase and Decrease in Supply—Factors Determining Supply—Elasticity of Supply—Measuring Elasticity of Supply at a Point on the Supply Curve—Perfectly Elastic and Perfectly Inelastic Supply—Factors Determining Elasticity of Supply—Questions and Problems for Review.

- 17. LINEAR PROGRAMMING** 279-290
- Meaning of Linear Programming—Basic Concepts and Terms of Linear Programming : Process and Process Rays; Objective Function; Constraints; Feasible Solution; Optimum Solution—Choice of Products: Maximisation of Profits—Choice of Process : Output Maximisation Subject to Some Constraints—Output Maximisation with One Limited Input—a Special Problem in Linear Programming : Diet Problem.
- PART IV**
- MARKET STRUCTURE AND PRICING OF PRODUCTS**
- 18. MARKET STRUCTURES AND CONCEPTS OF REVENUE** 293-308
- Meaning of Market—Classification of Market Structures: Perfect Competition; Monopoly; Monopolistic Competition; Oligopoly—Concepts of Revenue—Average Revenue—Marginal Revenue—Average Revenue and Marginal Revenue under Monopoly and Monopolistic Competition—Average Revenue and Marginal Revenue under Perfect Competition—Average Revenue, Marginal Revenue and Price Elasticity of Demand—Relationship Between Three Types of Revenue (AR, MR, TR) and Price Elasticity of Demand—Questions and Problems for Review.
- 19. OBJECTIVES OF BUSINESS FIRMS** 309-320
- Profit Maximisation—Achieving Maximum Long-Term Profits—Sales Maximisation—Utility Maximisation: Utility Maximisation: Utility Maximisation by Entrepreneur- Owner; Utility Maximisation by Managers of Large Business Firms—Hall and Hitch's Mark-Up Pricing Approach: Achieving Normal Profits—Satisficing Behaviour—Staff Maximisation—Growth Maximisation—Case for Objective of Maximisation of Profits—Questions and Problems for Review.
- 20. EQUILIBRIUM OF THE FIRM AND INDUSTRY UNDER PERFECT COMPETITION** 321-344
- Meaning of the Equilibrium of a Firm—Equilibrium of the Firm Under Perfect Competition: TR-TC Approach—Firm's—Equilibrium: Marginal Revenue—Marginal Cost Approach—Short-Run Equilibrium of the Firm under Perfect Competition—Shutting-Down Decision in the Short Run— Long-Run Equilibrium of the Firm under Perfect Competition—Equilibrium of the Industry—Short-run Supply Curve of the Perfectly Competitive Firm—Short-Run Supply Curve of the Competitive Industry—Long-Run Supply Curve under Perfect Competition ∴ Long-Run Supply Curve of the Increasing Cost Industry; Long-Run Supply Curve of the Constant Cost Industry; Long-Run Supply Curve of the Decreasing Cost Industry—Questions and Problems for Review.
- 21. PRICING IN A PERFECTLY COMPETITIVE MARKET** 345-371
- Introduction—Conditions of Perfect Competition—Determination of Equilibrium Price—Market Equilibrium : Balance Between Demand and Supply—Changes in Market Equilibrium—Demand-Supply Model of Pricing: Mathematical Analysis—Importance of Time Element in Price Determination—Determination of Market-Period Price : Perishable Good —Determination of Short-Run Price—Determination of Long-Run Normal Price—Long-Run Normal Price in Increasing-Cost Industry—Long-Run Normal Price in Constant-Cost Industry—Long-Run Normal Price in Decreasing-Cost Industry—Question for Review.

Appendix to Chapter 21 : Practical Application of Perfect Competition Model

- Price Control and Rationing—Minimum Support Price—Incidence of Indirect Taxes—Questions for Review.
- 22. PRICE AND OUTPUT UNDER MONOPOLY 372-387**
 Meaning of Monopoly—Conditions Necessary for the Existence of Monopoly—Nature of Demand and Marginal Revenue Curves under Monopoly—Price and Output under Monopoly—Price and Marginal Cost under Monopoly—Monopoly Equilibrium and Price Elasticity of Demand—Long-Run Equilibrium Under Monopoly—Monopoly Equilibrium and Perfectly Competitive Equilibrium Compared—Monopoly, Resource Allocation and Social Welfare—Multiplant Monopoly—Questions and Problem for Review.
- 23. PRICE DISCRIMINATION 388-403**
 Meaning of Price Discrimination—Degrees of Price Discrimination—When is Price Discrimination Possible? When is Price Discrimination Profitable? Price and Output Equilibrium under Price Discrimination—An Important Application: Price Discrimination in Case of Dumping—Comparing Discriminating Monopoly Output and Simple Monopoly Output—Price Discrimination and Social Welfare : Is Price Discrimination Socially Justified?—Questions and Problems for Review.
- 24. MONOPOLISTIC COMPETITION 404-424**
 Imperfect Competition : Monopolistic Competition and Oligopoly—Monopolistic Competition : Meaning—Important Features of Monopolistic Competition—The Nature of Demand and Marginal Revenue Curves Under Monopolistic Competition—Price-Output Equilibrium Under Monopolistic Competition—Long-Run Price-Output Equilibrium Under Monopolistic Competition Compared With that Under Perfect Competition—Selling Costs and Advertising—Selling Costs Distinguished from Production Costs—Effect of Selling Costs (Advertising Expenditure) on Demand—The Curve of Average Selling Cost—Optimum Level of Advertising Outlay (Selling Costs): With Price and Product Design as Constants—Optimum Level of Advertising : With Price as a Variable and Product as Constant—Excess Capacity under Monopolistic Competition or Imperfect—Questions for Review.
- 25. PRICE AND OUTPUT UNDER OLIGOPOLY 425-453**
 Characteristics of Oligopoly—Are Price and Output Under Oligopoly Indeterminate—Collusive Oligopoly : Price and Output under Cartel—Price Leadership—Types of Price Leadership—Price-Output Determination under Low Cost Price Leadership—Price Leadership by the Dominant Firm—Difficulties of Price Leadership—Kinked Demand Curve Theory of Oligopoly—A Critical Appraisal of Kinked Demand Curve Theory—Questions for Review.
- Appendix to chapter 25: Classical Models of Oligopoly**
 Cournot's Duopoly Model—Bertrand Duopoly Model—Chamberlin's Oligopoly Model—Questions for Review.
- 26. PRICING IN PRACTICE: MARK-UP PRICING AND SALES MAXIMISATION MODEL 454-466**
 Mark-Up Pricing—Synthesis Between Mark-Up Pricing and Profit Maximisation—Critical Evaluation of Mark-Up Pricing—Sales Maximisation Model of Oligopoly—Emphasis on Non-Price Competition in Sales Maximisation Model—

Sales-Maximisation Model : Optimum Advertising Expenditure—Critical Appraisal of Sales Maximisation Model—Questions for Review.

27. PRACTICAL APPLICATIONS OF MONOPOLY 467-473

Incidence of Lump-sum Tax under Monopoly —Incidence of Indirect Taxes under Monopoly—Regulation of Monopoly Price—Marginal Cost Pricing—Average Cost Pricing —Price Regulation and Natural Monopoly—Questions for Review.

PART V

FACTOR PRICING AND INCOME DISTRIBUTION

28. MARGINAL PRODUCTIVITY THEORY OF DISTRIBUTION 477-490

Functional Vs. Personal Distribution—Theory of Distribution as a Special Case of the Theory of Price—Derived Demand for a Factor—Concepts of Productivity : Average Physical Product (APP); Marginal Physical Product (MPP)—Marginal Revenue Product (MRP) and Value of Marginal Product (VMP)—Marginal Productivity Theory of Distribution : J.B. Clark's Version; Marshall-Hicks Approach—Shortcomings of Marginal Productivity Theory —Determinants of Demand for Factors—Questions for Review.

29. DETERMINATION OF WAGES 491-515

Nominal and Real Wages—Wage Determination Under Perfect Competition—Demand for Labour by an Individual Firm—Supply of Labour—Wage Determination under Monopsony—Exploitation of Labour—Marginal Productivity Theory and Role of Trade Unions in Raising Wages—Trade Unions, Collective Bargaining and Wages—Role of Trade Unions in Raising Wages and Removing Exploitation in Case of Monopsony—Why Wage Rates Differ? Fixation of Minimum Wages—Case for Minimum Wages—Questions for Review.

30. THEORY OF RENT 516-532

Concept of Rent—Ricardian Theory of Rent : Scarcity Rent : Differential Rent—Critical Evaluation of Ricardian Theory of Rent—Explaining Determination of Land Rent through Demand and Supply—Rent's Share in National Income and Stagnation of Economic Growth—Land Rent, Cost and Price—Modern Theory of Rent : Economic Rent as a Surplus Return over Transfer Earnings; Economic Rent arises when the Supply of a Factor is Less than Perfectly Elastic—Earnings of all Factors may contain an Element of Economic Rent—Quasi Rent—Questions for Review.

31. THEORIES OF INTEREST 533-549

Classical Theory of Interest—Critical Appraisal of the Classical Theory of Interest—Loanable Funds Theory of Interest—Critical Evaluation of Loanable Funds—Keynes's Liquidity Preference Theory of Interest—Critical Appraisal of Keynes's Liquidity Preference Theory of Interest—Questions for Review

32. THEORIES OF PROFIT 550-559

Introduction—Profits as a Residual Income—Clark's Dynamic Theory of Profits—Schumpeter's Innovations Theory of Profits—Knight's Uncertainty Theory of Profits: Unpredictable Changes and Profits; What Causes Uncertainty—Insurable and Non-Insurable Risks—Monopoly Theory of Profits—Critical Evaluation of Monopoly Theory of Profits—Questions for Review.

33. NATIONAL INCOME AND MEASUREMENT 560-574

National Income: Meaning—Circular Flow of Income—National Income and National Product—Concepts of National Income—Measurement of National Income: Value Added Method: Income Method; Expenditure Method—Difficulties in Measurement of National Income in Developing Countries—National Income and Economic Welfare—Questions and Problems for Review.

PART VI**CAPITAL BUDGETING : LONG TERM INVESTMENT ANALYSIS****34. CAPITAL BUDGETING: ANALYSIS OF INVESTMENT PROJECTS 577-590**

Introduction—Capital Budgeting: Meaning—Importance of Capital Budgeting — Uncertainty and Capital Expenditure—Classification of Capital Projects—Steps in Capital Budgeting—Estimating Cash Flows—Estimating Cash Flows of a Project: An Illustration—Evaluation of Capital Projects: Payback Period Method—Net Present Value Method—Net Present Value Method: Choice Among Multiple Projects—Internal Rate of Return (IRR) Method—Profitability Index Method—The Level of Capital Expenditure and Capital Budgeting—Questions and Problems for Review.

35. CAPITAL BUDGETING: ANALYSIS OF INVESTMENT PROJECTS 591-609

Introduction—Cost of Debt Capital — Cost of Equity Capital — Risk-Free Rate Plus Risk Premium—Discounted Cash Flow Model — Capital Asset Pricing Model (CAPM) — Overall Cost of Capital or Composite Cost of Capital — Numerical Problems—Questions for Review.

33. NATIONAL INCOME AND MEASUREMENT

National Income: Meaning—Circular Flow of Income—National Income and National Product—Concepts of National Income—Measurement of National Income: Value Added Method; Income Method; Expenditure Method—Difficulties in Measurement of National Income in Developing Countries—National Income and Economic Welfare—Questions and Problems for Review.

PART VI

CAPITAL BUDGETING: LONG TERM INVESTMENT ANALYSIS

34. CAPITAL BUDGETING: ANALYSIS OF INVESTMENT PROJECTS

Introduction—Capital Budgeting: Meaning—Importance of Capital Budgeting—Uncertainty and Capital Expenditure—Classification of Capital Projects—Steps in Capital Budgeting—Estimating Cash Flows—Estimating Cash Flows of a Project: An Illustration—Evaluation of Capital Projects: Payback Period Method—Net Present Value Method—Net Present Value Method: Choice Among Multiple Projects—Internal Rate of Return (IRR) Method—Profitability Index Method—The Level of Capital Expenditure and Capital Budgeting—Questions and Problems for Review.

35. CAPITAL BUDGETING: ANALYSIS OF INVESTMENT PROJECTS

Introduction—Cost of Debt Capital—Cost of Equity Capital—Risk-Free Rate Plus Risk Premium—Discounted Cash Flow Model—Capital Asset Pricing Model (CAPM)—Overall Cost of Capital or Composite Cost of Capital—Numerical Problems—Questions for Review.
