Preface to the Second Edition *v*
Preface *vi*

CHAPTER 1 STATISTICS: AN OVERVIEW **1-26**

1.1 Reasons for Learning Statistics 1
1.2 Growth and Development of Statistics 2
1.3 Statistical Thinking and Analysis 3
1.4 Statistics Defined 3
1.5 Types of Statistical Methods 5
1.6 Importance and Scope of Statistics 6
1.6.1 Statistics and the State 6
1.6.2 Statistics in Economics 6
1.6.3 Statistics in Business Management 7
1.6.4 Statistics in Physical Sciences 7
1.6.5 Statistics in Social Sciences 7
1.6.6 Statistics in Medical Sciences 8
1.6.7 Statistics and Computers 8
1.7 Limitations of Statistics 8
1.7.1 Statistics Does not Study Qualitative Phenomena 8
1.7.2 Statistics Does not Study Individuals 9
1.7.3 Statistics Can Be Misused 9
1.8 How to Lie with Statistics 9
Conceptual Questions 1A 10
1.9 Need for Data 11
1.9.1 Types of Data 11
1.10 Principles of Measurement 12
1.11 Sources of Data 16
1.11.1 Primary Data Sources 16
1.11.2 Secondary Data Sources 23
Conceptual Questions 1B 25
Chapter Concepts Quiz 26

CHAPTER 2 DATA CLASSIFICATION, TABULATION AND PRESENTATION **27-80**

2.1 Introduction 27
2.2 Classification of Data 27

2.2.1 Requisites of Ideal Classification 28
2.2.2 Basis of Classification 29
2.3 Organizing Data Using Data Array 30
2.3.1 Frequency Distribution 31
2.3.2 Methods of Data Classification 33
2.3.3 Bivariate Frequency Distribution 39
2.3.4 Types of Frequency Distributions 40
Conceptual Questions 2A 42
Self-Practice Problems 2A 43
Hints and Answers 44
2.4 Tabulation of Data 44
2.4.1 Objectives of Tabulation 44
2.4.2 Parts of a Table 45
2.4.3 Types of Tables 46
2.4.4 General and Summary Tables 48
2.4.5 Original and Derived Tables 48
Conceptual Questions 2B 52
Self-Practice Problems 2B 52
Hints and Answers 54
2.5 Graphical Presentation of Data 55
2.5.1 Functions of a Graph 56
2.5.2 Advantages and Limitations of Diagrams (Graph) 56
2.5.3 General Rules for Drawing Diagrams 57
2.6 Types of Diagrams 57
2.6.1 One-Dimensional Diagrams 58
2.6.2 Two-Dimensional Diagrams 68
2.6.3 Three-Dimensional Diagrams 71
2.6.4 Pictograms or Ideographs 71
2.6.5 Cartograms or Statistical Maps 71
2.7 Exploratory Data Analysis 71
2.7.1 Stem-and-Leaf Displays 72
Conceptual Questions 2C 73
Self-Practice Problems 2C 73
Hints and Answers 75
Formulae Used 76
Chapter Concepts Quiz 76
Review Self-Practice Problems 77
Case Studies 79

CHAPTER 3 MEASURES OF CENTRAL TENDENCY 81-132

3.1 Introduction 81
3.2 Objectives of Averaging 82
3.3 Requisites of a Measure of Central Tendency 82
3.4 Measures of Central Tendency 83
3.5 Mathematical Averages 83
3.5.1 Arithmetic Mean of Ungrouped Data 83
3.5.2. Arithmetic Mean of Grouped (or Classified) Data 86
3.5.3 Some Special Types of Problems and Their Solutions 89
3.5.4 Advantages and Disadvantages of Arithmetic Mean 94
3.5.5 Weighted Arithmetic Mean 97
Conceptual Questions 3A 99
Self-Practice Problems 3A 99
Hints and Answers 101
3.6 Geometric Mean 101
3.6.1 Combined Geometric Mean 103
3.6.2 Weighted Geometric Mean 103
3.6.3 Advantages, Disadvantages and Applications of G.M. 104

Conceptual Questions 3B 105
Self-Practice Problems 3B 105
Hints and Answers 106
3.7 Harmonic Mean 107
3.7.1 Advantages, Disadvantages and Applications of H.M. 107
3.8 Relationship between A.M., G.M. and H.M. 108
Self-Practice Problems 3C 108
Hints and Answers 108
3.9 Averages of Position 109
3.9.1 Median 109
3.9.2 Advantages, Disadvantages and Applications of Median 111
3.10 Partition Values—Quartiles, Deciles and Percentiles 112
3.10.1 Graphical Method for Calculating Partition Values 113
Conceptual Questions 3C 116
Self-Practice Problems 3D 116
Hints and Answers 117
3.11 Mode 118
3.11.1 Graphical Method for Calculating Mode Value 120
3.11.2 Advantages and Disadvantages of Mode Value 121
3.12 Relationship between Mean, Median and Mode 121
3.13 Comparison between Measures of Central Tendency 122
Conceptual Questions 3D 122
Self-Practice Problems 3E 123
Hints and Answers 125
Formulae Used 125
Chapter Concepts Quiz 125
Review Self-Practice Problems 126
Hints and Answers 128
Case Studies 130

CHAPTER 4 MEASURES OF DISPERSION 133–170

4.1 Introduction 133
4.2 Significance of Measuring Dispersion (Variation) 134
4.2.1 Essential Requisites for a Measure of Variation 135
4.3 Classification of Measures of Dispersion 135
4.4 Distance Measures 136
4.4.1 Range 136
4.4.2 Interquartile Range or Deviation 138
Conceptual Questions 4A 140
Self-Practice Problems 4A 140
Hints and Answers 141
4.5 Average Deviation Measures 142
4.5.1 Mean Absolute Deviation 142
4.5.2 Variance and Standard Deviation 146
4.5.3 Mathematical Properties of Standard Deviation 150
4.5.4 Chebyshev's Theorem 152
4.5.5 Coefficient of Variation 157
Conceptual Questions 4B 159
Self-Practice Problems 4B 160
Hints and Answers 162
Formulae Used 163
Chapter Concepts Quiz 163
Review Self-Practice Problems 165
Hints and Answers 167
Case Studies 170

CHAPTER 5 SKEWNESS, MOMENTS AND KURTOSIS **171-194**

5.1 Introduction 171
5.2 Measures of Skewness 172
5.2.1 Relative Measures of Skewness 172
Conceptual Questions 5A 178
Self-Practice Problems 5A 179
Hints and Answers 180
5.3 Moments 181
5.3.1 Moments about Mean 181
5.3.2 Moments about Arbitrary Point 182
5.3.3 Moments about Zero or Origin 182
5.3.4 Relationship between Central Moments and Moments about Any Arbitrary Point 182
5.3.5 Moments in Standard Units 183
5.3.6 Sheppard's Corrections for Moments 183
5.4 Kurtosis 186
5.4.1 Measures of Kurtosis 186
Conceptual Questions 5B 189
Self Practice Problems 5B 189
Hints and Answers 190
Formulae Used 190
Review Self-Practice Problems 191
Hints and Answers 192

CHAPTER 6 FUNDAMENTALS OF PROBABILITY **195-232**

6.1 Introduction 195
6.2 Concepts of Probability .195
6.2.1 Random Experiment 196
6.2.2 Sample Space 196
6.2.3 Event Types 197
6.3 Definition of Probability 198
6.3.1 Classical Approach 198
6.3.2 Relative Frequency Approach 199
6.3.3 Subjective Approach 200
6.3.4 Fundamental Rules of Probability 200
6.3.5 Glossary of Probability Terms 200
6.4 Counting Rules for Determining the Number of Outcomes 200
6.4.1 Multistep Experiments 201
6.4.2 Combinations 201
6.4.3 Permutations 201
Conceptual Questions 6A 203
Self-Practice Problems 6A 203
Hints and Answers 204
6.5 Rules of Probability and Algebra of Events 205
6.5.1 Rules of Addition 205
6.5.2 Rules of Multiplication 208
6.6 Probability Tree Diagram 216
Self-Practice Problems 6B 217
Hints and Answers 219
6.7 The Bayes' Theorem 221
Self-Practice Problems 6C 223
Hints and Answers 224
Formulae Used 225
Chapter Concepts Quiz 225
Review Self-Practice Problems 227
Hints and Answers 229
Case Studies 231

CHAPTER 7 PROBABILITY DISTRIBUTIONS 233-276

7.1 Introduction 233
7.2 Probability Distribution Function (pdf) 234
7.3 Cumulative Probability Distribution Function (cdf) 235
7.4 Expected Value and Variance of a Random Variable 237
7.4.1 Expected Value 237
7.4.2 Variance and Standard and Deviation 238
7.4.3 Properties of Expected Value and Variance 238
Conceptual Questions 7A 241
Self-Practice Problems 7A 242
Hints and Answers 242
7.5 Discrete Probability Distributions 243
7.5.1 Binomial Probability Distribution 243
Conceptual Questions 7B 248
Self-Practice Problems 7B 248
Hints and Answers 249
7.5.2 Poisson Probability Distribution 250
7.5.3 Negative Binomial Probability Distribution 254
7.5.4 Multinomial Probability Distribution 255
7.5.5 Hypergeometric Probability Distribution 255
Conceptual Questions 7C 256
Self-Practice Problems 7C 256
Hints and Answers 257
7.6 Continuous Probability Distributions 259
7.6.1 Normal Probability Distribution Function 260
7.6.2 Approximation of Binomial and Poisson Distributions to Normal Distribution 263
7.6.3 Uniform (Rectangular) Distribution 267
7.6.4 Exponential Probability Distribution 268
7.6.5 Gamma (or Erlang) Distribution 268
7.6.6 Beta Distribution 269
Conceptual Questions 7D 269
Self-Practice Problems 7D 269
Hints and Answers 270
Formulae Used 271
Chapter Concepts Quiz 272
Review Self-Practice Problems 273
Hints and Answers 275

CHAPTER 8 SAMPLING AND SAMPLING DISTRIBUTIONS 277-304

8.1 Introduction 277
8.2 Reasons of Sample Survey 278
8.3 Types of Bias During Sample Survey 278
8.3.1 Sampling and Non-Sampling Errors 278
8.4 Population Parameters and Sample Statistics 279
8.5 Principles of Sampling 279
8.5.1 Principle of Statistical Regularity 280
8.5.2 Principle of Inertia of Large Numbers 280
8.6 Sampling Methods 280
8.6.1 Probability Sampling Methods 280
8.6.2 Non-Random Sampling Methods 283
8.6.3 Choice of sampling methods 284
8.7 Sampling Distributions 285
8.7.1 Standard Error of Statistic 285
8.7.2 Distinction between Population, Sample Distributions and Sampling Distributions 286

Conceptual Questions 8A 287
8.8 Sampling Distribution of Sample Mean 288
8.8.1 Sampling Distribution of Mean When Population has Non-Normal Distribution 288
8.8.2 Sampling Distribution of Mean When Population has Normal Distribution 289
8.8.3 Sampling Distribution of Difference Between two Sample Means 294
Self-Practice Problems 8A 296
Hints and Answers 297
8.9 Sampling Distribution of Sample Proportions 298
8.9.1 Sampling Distribution of the Difference of two Proportions 298
Self-Practice Problems 8B 300
Hints and Answers 300
Formulae Used 301
Chapter Concepts Quiz 301
Review Self-Practice Problems 303
Hints and Answers 303

CHAPTER 9 ESTIMATION AND CONFIDENCE INTERVALS 305-326

9.1 Introduction 305
9.2 Point Estimation 306
9.2.1 Properties of a Point Estimator 306
9.2.2 Draw back of Point Estimates 308
9.3 Confidence Interval Estimation 308
9.4 Interval Estimation of Population Mean (σ known) 309
9.4.1 Interval Estimation for Difference of Two Means 311
9.5 Interval Estimation of Population Mean (σ Unknown) 311
Self-Practice Problems 9A 313
Hints and Answers 314
9.6 Interval Estimation for Population Proportion 314
Self-Practice Problems 9B 316
Hints and Answers 316
9.7 Estimating Sample Size 317
9.7.1 Sample Size for Estimating Population Mean 317
9.7.2 Sample Size for Estimating Population Proportion 319
9.7.3 Sample Size Determination for Finite Population 320
Conceptual Questions 9A 320
Self-Practice Problems 9C 321
Hints and Answers 321
Formulae Used 322
Chapter Concepts Quiz 322
Review Self-Practice Problems 323
Hints and Answers 325

CHAPTER 10 HYPOTHESIS TESTING 327-380

10.1 Introduction 327
10.2 Hypothesis and Hypothesis Tasting 327
10.2.1 Formats of Hypothesis 328
10.3 The Rationale for Hypothesis Testing 328
10.4 General Procedure for Hypothesis Testing 329
10.5 Direction of the Hypothesis Test 332
10.6 Errors in Hypothesis Testing 333
10.6.1 Power of a Statistical Test 333
Conceptual Questions 10A 336

10.7 Hypothesis Testing for Population Parameters with Large Samples 336
10.7.1 Hypothesis Testing for Single Population Mean 336
10.7.2 Relationship between Interval Estimation and Hypothesis Testing 337
10.7.3 *p*-Value Approach to Test Hypothesis of Single Population Mean 340
10.7.4 Hypothesis Testing for Difference between Two Populations Means 341
Self-Practice Problems 10A 345
Hints and Answers 346
10.8 Hypothesis Testing for Single Population Proportion 347
10.8.1 Hypothesis Testing for Difference between Two Population Proportions 347
10.9 Hypothesis Testing for a Binomial Proportion 350
Self-Practice Problems 10B 351
Hints and Answers 352
10.10 Hypothesis Testing for Population Mean with Small Samples 353
10.10.1 Properties of Student's T-Distribution 353
10.10.2 Hypothesis Testing for Single Population Mean 354
10.10.3 Hypothesis Testing for Difference of Two Population Means (Independent Samples) 357
10.10.4 Hypothesis Testing for Difference of Two Population Means (Dependent Samples) 360
Self-Practice Problems 10C 364
Hints and Answers 365
10.11 Hypothesis Testing Based on F-Distribution 367
10.11.1 Properties of F-Distribution 368
10.11.2 Comparing Two Population Variances 369
Self-Practice Problems 10D 370
Hints and Answers 371
Formulae Used 372
Chapter Concepts Quiz 373
Review Self-Practice Problems 374
Hints and Answers 376

CHAPTER 11 CHI-SQUARE AND OTHER NON-PARAMETRIC TESTS 381–420

11.1 Introduction 381
11.2 Advantages and Limitations of Non-Parametric Methods 382
11.3 The Chi-Square Distribution 382
11.3.1 Properties of χ^2 Distribution 383
11.3.2 Conditions for the Applications of χ^2 Test 383
11.4 The Chi-Square Test-Statistic 384
11.4.1 Grouping of Small Frequencies 384
11.5 Applications of χ^2 Test 385
11.5.1 Contingency Table Analysis: Chi-square Test of Independence 385
Self-Practice Problems 11A 389
Hints and Answers 390
11.5.2 Chi-Square Test for Goodness-of-fit 391
11.5.3 Yate's Correction for Continuity 394
Self-Practice Problems 11B 396
Hints and Answers 396
11.5.4 χ^2 Test for Population Variance 397
11.5.5 Coefficient of Contingency 399
11.5.6 Chi-Square Test of Homogeneity 399
Conceptual Questions 11A 401
11.6 The sign Test for Paired Data 401

11.7 Runs Test for Randomness 403
11.8 Mann-Whitney U-Test 405
11.9 Wilcoxon Matched Pairs Test 407
11.10 Kruskal-Wallis Test 409
Self-Practice Problems 11C 411
Hints and Answers 413
Formulae Used 414
Chapter Concepts Quiz 414
Review Self-Practice Problems 11C 415
Hints and Answers 417

CHAPTER 12 ANALYSIS OF VARIANCE **421-446**

12.1 Introduction 421
12.2 Analysis of Variance Approach 423
12.3 Testing Equality of Population (Treatment) Means: One-way Classification 423
12.3.1 Steps for Testing Null Hypothesis 425
12.4 Inferences About Population (Treatment) Means 431
Self-Practice Problems 12A 432
Hints and Answers 432
12.5 Testing Equality of Population (Treatment) Means: Two-Way Classification 433
Conceptual Questions 12A 437
Self-Practice Problems 12B 438
Hints and Answers 439
Formulae Used 440
Chapter Concepts Quiz 441
Review Self-Practice Problems 442
Hints and Answers 443
Case Studies 444

CHAPTER 13 CORRELATION ANALYSIS **447-480**

13.1 Introduction 447
13.2 Significance of Measuring Correlation 448
13.3 Correlation and Causation 448
13.4 Types of Correlations 449
13.4.1 Positive and Negative Correlation 449
13.4.2 Linear and Non-Linear Correlation 450
13.4.3 Simple, Partial, and Multiple Correlation 450
13.5 Methods of Correlation Analysis 450
13.5.1 Scatter Diagram Method 451
13.5.2 Karl Pearson's Correlation Coefficient 454
13.5.3 Probable Error and Standard Error of Coefficient of Correlation 455
13.5.4 The Coefficient of Determination 455
Self-Practice Problems 13A 461
Hints and Answers 462
13.5.5 Spearman's Rank Correlation Coefficient 462
13.5.6 Method of Least Squares 469
13.5.7 Auto-Correlation Coefficient 469
Self-Practice Problems 13B 470
Hints and Answers 471
13.6 Hypothesis Testing for Correlation Coefficient 471
13.6.1 Hypothesis Testing about Population Correlation Coefficient (Small Sample) 472

13.6.2 Hypothesis Testing about Population Correlation Coefficient (Large Sample) 473
13.6.3 Hypothesis Testing about the Difference between Two Independent Correlation Coefficients 474
Conceptual Questions 13A 475
Self-Practice Problems 13C 476
Hints and Answers 476
Formulae Used 477
Chapter Concepts Quiz 478
Review Self-Practice Problems 479
Hints and Answers 480

CHAPTER 14 REGRESSION ANALYSIS 481-512

14.1 Introduction 481
14.2 Advantages of Regression Analysis 482
14.3 Types of Regression Models 482
14.3.1 Simple and Multiple Regression Models 482
14.3.2 Linear and Non-Linear Regression Models 483
14.4 Estimation: The method of Least Squares 484
14.5 Assumptions for a Simple Linear Regression Model 485
14.6 Parameters of Simple Linear Regression Model 485
14.6.1 Regression Coefficients 486
14.7 Methods to Determine Regression Coefficients, 487
14.7.1 Least Squares Normal Equations 487
14.7.2 Deviations Method 489
14.7.3 Regression Coefficients for Grouped Sample Data 495
Self-Practice Problems 14A 497
Hints and Answers 499
14.8 Standard Error of Estimate and Prediction Intervals 501
14.8.1 Coefficient of Determination: Partitioning of Total Variation 504
Conceptual Questions 14A 506
Formulae Used 507
Chapter Concepts Quiz 507
Review Self-Practice Problems 508
Hints and Answers 510
Case Studies 512

CHAPTER 15 PARTIAL AND MULTIPLE CORRELATION AND REGRESSION ANALYSIS 513-537

15.1 Introduction 513
15.2 Assumptions in Multiple Linear Regression 514
15.3 Estimating Parameters of Multiple Regression Model 515
15.3.1 Estimation: The Method of Least Squares 515
15.3.2 Partial Regression Coefficients 516
15.3.3 Relationship between Partial Regression Coefficients and Correlation Coefficients 517
Self-Practice Problems 15A 521
Hints and Answers 522
15.4 Standard Error of Estimate for Multiple Regression 523
15.4.1 Significance Test of Regression Model 524
15.5 Coefficient of Multiple Determination 525
15.6 Multiple Correlation Analysis 526
15.7 Partial Correlation Analysis 527
15.7.1 Relationship between Multiple and Partial Correlation Coefficients 528
Conceptual Questions 15A 532
Self-Practice Problems 15B 532
Hints and Answers 533

Formulae Used 534
Chapter Concepts Quiz 534
Review Self-Practice Problems 536
Hints and Answers 536

CHAPTER 16 FORECASTING AND TIME SERIES ANALYSIS **538–617**

16.1 Introduction 537
16.2 Types of Forecasts 538
16.3 Timing of Forecasts 538
16.4 Forecasting Methods 539
16.4.1 Quantitative Forecasting Methods 539
16.4.2 Qualitative Forecasting Methods 540
16.5 Steps of Forecasting 541
16.6 Time Series Analysis 541
16.6.1 Objectives of Time Series Analysis 541
16.6.2 Time Series Patterns 542
16.6.3 Components of a Time Series 542
16.7 Time Series Decomposition Models 542
16.7.1 Multiplicative Model 543
16.7.2 Additive Model 543
Conceptual Questions 16A 543
16.8 Quantitative Forecasting Methods 544
16.8.1 Freehand Method 544
16.8.2 Smoothing Methods 545
16.8.3 Exponential Smoothing Methods 550
Self-Practice Problems 16A 554
Hints and Answrs 555
16.9 Trend Projection Methods 557
16.9.1 Linear Trend Model 557
16.9.2 Quadratic Trend Model 559
16.9.3 Exponential Trend Model 561
16.9.4 Changing the Origin and Scale of Equations 562
Self-Practice Problems 16B 563
Hints and Answers 564
16.10 Measurement of Seasonal Effects 565
16.10.1 Seasonal Index 566
16.10.2 Method of Simple Averages 566
16.10.3 Ratio-to-Trend Method 569
16.10.4 Ratio-to-Moving Average Method 571
16.10.5 Link Relative Method 574
16.11 Measurement of Cyclical Variations—Residual Method 577
16.12 Measurement of Irregular Variations 577
Conceptual Questions 16B 577
Self-Practice Problems 16C 578
Hints and Answers 579
Formulae Used 580
Chapter Concepts Quiz 581
Review Self-Practice Problems 582
Hints and Answers 583

CHAPTER 17 INDEX NUMBERS **587–636**

17.1 Introduction 587
17.2 Index Number Defined 588
17.3 Types of Index Numbers 588
17.4 Characteristics and Uses of Index Numbers 590

17.4.1 Characteristics of Index Numbers 590
17.4.2 Uses of Index Numbers 590
Conceptual Questions 17A 591
17.5 Methods for Construction of Price Indexes 592
17.6 Unweighted Price Indexes 592
17.6.1 Single Price Index 592
17.6.2 Aggregative Price Index 593
17.6.3 Average Price Relative Index 594
Self-Practice Problems 17A 596
Hints and Answers 597
17.7 Weighted Price Indexes 599
17.7.1 Weighted Aggregative Price Index 599
17.7.2 Weighted Average of Price Relative Index 604
17.8 Quantity or Volume Indexes 606
17.9 Value Index 608
Self-Practice Problems 17B 609
Hints and Answers 610
17.10 Tests of Adequacy of Indexes 611
17.10.1 Time Reversal Test 611
17.10.2 Factor Reversal Test 612
17.10.3 Circular Test 613
17.11 Chain Indexes 614
17.12 Applications of Index Numbers 618
17.12.1 Changing the Base of an Index 618
17.12.2 Combining Two or More Overlapping Indexes 619
17.12.3 Correction (Adjustment) of Value of and Item 621
Self-Practice Problems 17C 622
Hints and Answers 623
17.13 Consumer Price Indexes 626
17.13.1 Uses of Consumer Price Index (CPI) Number 626
17.13.2 Construction of a Consumer Price Index 626
17.14 Problems of Index Numbers Construction 629
Conceptual Questions 17B 631
Formulae Used 631
Chapter Concepts Quiz 632
Review Self-Practice Problems 633
Hints and Answers 634

CHAPTER 18 STATISTICAL QUALITY CONTROL 637–672

18.1 Introduction 637
18.2 Quality and Quality Control 638
18.2.1 Quality Control 638
18.3 Cost of Quality Control 639
18.4 Statistical Quality Control 640
18.4.1 Definitions of Statistical Quality Control 641
18.5 Techniques of Statistical Quality Control 641
18.5.1 Through 100 Per Cent Inspection 641
18.5.2 Through Statistical Quality Control 641
18.6 In-Process Quality Control Techniques 642
18.6.1 Control Charts 643
18.6.2 Setting up the Control Limits 644
18.7 Control Charts for Variables 645
18.7.1 Mean or $\bar{x}$-Chart 645
18.7.2 R-Chart: A Control Chart for Dispersion 648
18.7.3 Choice and Interpretation of $\bar{x}$ and R Charts 649
Conceptual Questions 18A 651

Self-Practice Problems 18A 651
Hints and Answers 652
18.8 Control Charts for Attributes 652
18.8.1 C-Chart: Control Chart for Defects per Unit 652
18.8.2 *p*-Chart: Control Chart for Proportion of Defectives 654
18.8.3 *np*-Chart: Control Chart for Total Number of Defectives 655

CHAPTER 19 STATISTICAL DECISION THEORY 673-713

19.1 Introduction 673
19.2 Steps in Decision Theory Approach 674
19.3 Types of Decision-Making Environments 675
19.4 Decision-Making under Uncertainty 676
19.4.1 Criterion of Optimism (Maximax or Minimin) 676
19.4.2 Criterion of Pessimism (Maximin or Minimax) 676
19.4.3 Equally Likely Decision (Laplace) Criterion 676
19.4.4 Criterion of Realism (Hurwicz Criterion) 677
19.4.5 Criterion of Regret 677
Self-Practice Problems 19A 679
Hints and Answers 680
19.5 Decision-Making Under Risk 680
19.5.1 Expected Monetary Value (EMV) 681
19.5.2 Expected Opportunity Loss (EOL) 684
19.5.3 Expected Value of Perfect Information (EVPI) 686
19.6 Posterior Probabilities and Bayesian Analysis 692
Self-Practice Problems 19B, 697
Hints and Answers 698
19.7 Decision Tree Analysis, 698
Conceptual Questions 19A 706
