Preface *xxi*
About the Authors *xxv*

PART 1 INTRODUCTION TO DERIVATIVES AND RISK MANAGEMENT 1

1 An Overview of Derivative Contracts 3

- 1.1 Forward Contracts and Futures Contracts 4
- 1.2 Swaps 8
- 1.3 Options 14
- 1.4 Why Is It Important to Learn About Derivatives? 17
- 1.5 Summary 18
 - References 19
 - Notes 19
 - Problems 20

2 Risk and Risk Management 22

- 2.1 What Is Risk? 23
- 2.2 How Is Risk Measured? 24
 - 2.2.1 Random Variables, Probability Distributions, and Variance 24
 - 2.2.2 Measuring Risk Using Past Data 28
 - 2.2.3 Identifying Risk Exposure 30
- 2.3 Should Firms Manage Risk? 33
 - 2.3.1 Hedging Reduces the Expected Costs of Financial Distress 33
 - 2.3.2 Hedging Makes It More Likely that Future Attractive Investments Will Be Made by the Firm 34

2.3.3	It Is Less Costly for the Firm to Hedge Than for Individuals to Hedge	35
2.3.4	Firms May Have Better Information than Individuals	35
2.3.5	Nonsystematic Risks Should Be Hedged When Owners Are Not Well Diversified	36
2.3.6	Hedging Can Increase Debt Capacity	36
2.3.7	Risk Management Can Reduce Taxes	36
2.3.8	Risk-Averse Managers Will Prefer to Hedge	38
2.3.9	Other Reasons for Using Derivatives	39
2.4	What Should Be Done After Risk Exposures Have Been Identified?	39
2.5	Accounting for Derivatives: FAS 133	40
2.6	Summary	42
	Further Reading	42
	References	43
	Notes	44
	Problems	45
2	PART 2 FORWARD CONTRACTS AND FUTURES CONTRACTS	49
3	Introduction to Forward Contracts	51
3.1	General Concepts	51
3.2	Forward Rate Agreements	56
3.3	Forward Foreign Exchange Contracts	59
3.4	Summary	64
	Notes	64
	Problems	65
4	Using Forward Contracts to Manage Risk	68
4.1	Using Forwards to Manage Commodity Price Risk	68
4.1.1	Buying Forwards to Hedge Against Price Increases	68
4.1.2	Selling Forwards to Hedge Against Price Declines	70
4.2	Using Forwards to Manage Interest Rate Risk	73
4.2.1	Hedging Against an Increase in Interest Rates	73
4.2.2	Hedging Against a Decline in Interest Rates	76
4.3	Using Forward Foreign Exchange Contracts to Manage Risk	77
4.3.1	Managing the Risk That the Price of a Foreign Currency Will Rise	77
4.3.2	Managing the Risk That the Price of a Foreign Currency Will Decline	79

4.4	What Quantity Should Be Bought or Sold Forward?	81
4.5	Summary	82
	References	83
	Notes	83
	Problems	83
5	Determining Forward Prices and Futures Prices	87
5.1	Forward Commodity Prices	87
5.1.1	The Cost-of-Carry Model	87
5.1.2	Proof of the Cost-of-Carry Model	88
5.1.3	Examples	90
5.1.4	Transactions Costs	92
5.1.5	Implied Repo Rates and Implied Reverse Repo Rates	94
5.1.6	Forward Prices of Commodities: The Convenience Yield	96
5.1.7	Do Forward Prices Equal Expected Future Spot Prices?	98
5.1.8	Valuing a Forward Contract After Origination	101
5.2	Forward Exchange Rates	91
5.2.1	The Standard Approach to Deriving the Forward Exchange Rate	102
5.2.2	An Alternative Derivation of the Theoretical Forward Price	104
5.2.3	The Implied Repo Rate	107
5.3	Forward Interest Rates	108
5.3.1	Spot Rates and Forward Rates	108
5.3.2	How to Lock in a Forward Rate	112
5.4	Summary	114
	References	115
	Notes	115
	Problems	116
	<i>Appendix A</i> Selling Short	121
	<i>Appendix B</i> Day Count Methods	123
	<i>Appendix C</i> Computing the Future Value of Carry Return Cash Flows	124
6	Introduction to Futures	126
6.1	Futures Contracts and Forward Contracts	126
6.2	Margin Requirements for Futures Contracts	128
6.3	Marking to Market	130
6.4	Basis and Convergence	134
6.5	Should Futures Prices Equal Forward Prices?	137
6.6	Futures Contracts, Exchanges, and Regulation	142

6.7	The Purposes of Futures Markets	144
6.8	Reading Futures Prices in the <i>Wall Street Journal</i>	145
6.8.1	Commodity Futures	145
6.8.2	Financial Futures	147
6.9	Limits on Price Fluctuations	151
6.10	Orders and Position Limits	151
6.11	Individuals in the Futures Industry	154
6.11.1	Speculators	154
6.11.2	Hedgers	154
6.11.3	Arbitrageurs	154
6.11.4	Individuals on the Floor of an Exchange	155
6.11.5	Other Market Participants	155
6.12	Taxes and Commissions	156
6.12.1	Taxes	156
6.12.2	Commissions	157
6.13	Summary	157
	References	157
	Notes	159
	Problems	161
7	Risk Management with Futures Contracts	165
7.1	Introduction	165
7.2	Some Special Considerations in Hedging with Futures	170
7.3	The Hedge Ratio	172
7.3.1	The Portfolio Approach to a Risk-Minimizing Hedge	172
7.3.2	Dollar Equivalency	180
7.4	Tailing the Hedge	181
7.5	Managing the Futures Hedge	184
7.6	Summary	185
	References	185
	Notes	186
	Problems	187
8	Stock Index Futures	190
8.1	What Is An Index?	190
8.1.1	Price-Weighted Indexes: The Dow Jones Average	191
8.1.2	Value-Weighted Averages: The S&P 500 Stock Index	193
8.1.3	The Value Line Index	195

8.2	Pricing Stock Index Futures	198
8.2.1	An Illustration of Stock Index Futures Pricing	199
8.2.2	Synthetic Stock and Synthetic Treasury Bills	201
8.2.3	Transactions Costs: Commissions and Bid–Ask Spreads	202
8.2.4	More on Dividends	204
8.2.5	Program Trading	206
8.3	Risk Management with Stock Index Futures	209
8.3.1	Equity Risk	209
8.3.2	Adjusting the Beta of a Portfolio with Stock Index Futures	211
8.3.3	Stock Picking	216
8.3.4	An Anticipatory Hedge	217
8.3.5	Caveats About Hedging with Stock Index Futures	217
8.3.6	Using Stock Index Futures to Gain International Equity Exposure	218
8.4	Summary	219
	References	219
	Notes	220
	Problems	221
9	Treasury Bond and Treasury Note Futures	225
9.1	Features of the T-Bond Futures Contracts	225
9.1.1	Reading Spot T-Bond Prices	227
9.1.2	Reading T-Bond and T-Note Futures Prices	229
9.1.3	The Delivery Process for T-Bond and T-Note Futures Contracts	229
9.1.4	Which T-Bonds Are Deliverable into the T-Bond Futures Contract?	231
9.1.5	Conversion Factors and Invoice Amounts	231
9.1.6	Computing the Conversion Factors	233
9.2	Determining T-Bond and T-Note Futures Prices	234
9.2.1	Determining the Cheapest-to-Deliver T-Bond or T-Note: Maximize the Raw Basis	235
9.2.2	Determining the Cheapest-to-Deliver T-Bond or T-Note: Maximize the Implied Repo Rate	236
9.2.3	Determining the Cheapest-to-Deliver T-Bond or T-Note by Using Duration	238
9.2.4	An Example of How to Determine the Cheapest-to-Deliver T-Bond	238
9.2.5	Determining the Theoretical T-Bond Futures Price	240

9.2.6	When Is Delivery Likely to Take Place?	242
9.2.7	The Short Timing and Quality Options	243
9.3	Using T-Bond Futures to Shift Interest Rate Risk	244
9.3.1	Hedging Fundamentals	244
9.3.2	Hedging Long Bond Position: A Short Hedge	246
9.3.3	Hedging Interest Rate Risk During a GIC Offering Period: A Long Hedge	249
9.4	Advanced Applications of T-Bond and T-Note Futures Contracts	252
9.4.1	Changing the Duration of a Portfolio	252
9.4.2	Synthetic Instruments	254
9.4.3	Asset Allocation	254
9.4.4	The NOB, FOB, FITE, and MOB Spreads	258
9.5	Summary	259
	References	260
	Notes	260
	Problems	262
	<i>Appendix</i> Duration and Convexity	265
10	Treasury Bill and Eurodollar Futures	269
10.1	The Spot Treasury Bill Market	269
10.2	T-Bill Futures Contracts	273
10.3	The Eurodollar Cash Market	274
10.4	Eurodollar Futures Contracts	275
10.4.1	Theoretical Pricing of Eurodollar Futures Contracts	276
10.4.2	Arbitrage Pricing of Eurodollar Futures Contracts	278
10.5	Two Useful Applications of Eurodollar Futures Contracts	283
10.5.1	Shortening the Maturity of a Eurodollar Time Deposit	284
10.5.2	Lengthening the Maturity of a Eurodollar Time Deposit	285
10.6	Hedging with Short-Term Interest Rate Futures	286
10.6.1	Short Hedge Situations	287
10.6.2	Long Hedge Situations	287
10.6.3	The Hedge Ratio	287
10.6.4	Using T-Bill Futures to Protect the Value of a Portfolio	288
10.6.5	Using Eurodollar Futures to Lock in a Single-Period Borrowing Rate	290

10.6.6	Using Eurodollar Futures to Lock in a Multiperiod Borrowing Rate	292
10.6.7	Choosing Between a Strip Hedge and a Stack Hedge	295
10.7	Eurodollar Bundles and Packs	296
10.7.1	Bundles	296
10.7.2	Packs	297
10.8	Summary	297
	References	298
	Notes	298
	Problems	299

PART 3 SWAPS 303

11 An Introduction to Swaps 305

11.1	Interest Rate Swaps	305
11.1.1	An Example of a Plain Vanilla Fixed-for-Floating Interest Rate Swap	306
11.1.2	Generalizing the Plain Vanilla Fixed-Floating Interest Rate Swap	307
11.1.3	Characterizing a Fixed-Floating Interest Rate Swap as a Portfolio of FRAs	309
11.1.4	Characterizing a Fixed-Floating Interest Rate Swap as a Coupon-Bearing Asset Plus a Coupon-Bearing Liability	311
11.1.5	Quoting Prices of Plain Vanilla, Fixed-Floating Interest Rate Swaps	311
11.1.6	Other Interest Rate Swap Structures	312
11.2	Currency Swaps	313
11.2.1	An Example of a Fixed-Fixed Currency Swap	314
11.2.2	An Example of a Fixed-Floating Currency Swap	314
11.2.3	Other Currency Swap Structures	316
11.3	Commodity Swaps	317
11.4	Equity Index Swaps	317
11.5	Credit Risk in Swaps and Credit Swaps	318
11.6	Summary	320
	References	321
	Notes	321
	Problems	322

12	Using Swaps to Manage Risk	325
12.1	Using Interest Rate Swaps	325
12.1.1	Swapping to Lower Borrowing Costs	325
12.1.2	Swapping to Hedge Against the Risk of Rising Interest Rates	328
12.1.3	Swapping to Hedge Against the Risk of Falling Interest Rates	330
12.1.4	Swaps, Gap Analysis, and Duration	331
12.2	Using Currency Swaps	333
12.2.1	Swapping to Lower Borrowing Costs in a Foreign Country	333
12.2.2	Swapping to Hedge Against the Risk of a Decline in a Revenue Stream	335
12.2.3	Swapping to Hedge Against the Risk of an Increase in Cost	335
12.2.4	Swapping to Hedge Against the Risk of a Decline in the Value of an Asset	335
12.2.5	Swapping to Hedge Against the Risk of a Rise in the Value of Liability	336
12.3	Using Commodity Swaps	336
12.4	Using Equity Swaps	337
12.5	Using Index Swaps	338
12.6	Using Diff Swaps	339
12.7	Summary	340
	References	340
	Notes	340
	Problems	341
13	Pricing and Valuing Swaps	343
13.1	Pricing and Valuing Plain Vanilla Fixed–Floating Interest Rate Swaps	343
13.1.1	An Example of Fixed–Floating Interest Rate Swap Pricing	344
13.1.2	A Shortcut to Pricing At-Market Fixed–Floating Interest Rate Swaps at Origination	345
13.1.3	Valuing an Interest Rate Swap After Origination	346
13.1.4	Using FRAs and Futures to Price Swaps	349
13.2	Pricing a Currency Swap	354

13.2.1	An Example of Pricing a Fixed-Fixed Currency Swap	354
13.2.2	Pricing a Fixed-Floating Currency Swap	356
13.2.3	Valuing a Fixed-Floating Currency Swap After Origination	359
13.2.4	Pricing a Diff Swap	361
13.3	Pricing a Commodity Swap	364
13.4	Summary	366
	Notes	366
	Problems	367

PART 4 OPTIONS 371

14 Introduction to Options 373

14.1	Call Options	373
14.2	Put Options	375
14.3	In The Money, At the Money, Out of the Money	376
14.4	Intrinsic Value and Time Value	376
14.5	Payout Protection	377
14.6	Pricing at Expiration	378
	14.6.1 Call Values at Expiration	378
	14.6.2 Put Values at Expiration	380
14.7	A Brief Look at Option Pricing Before Expiration	381
	14.7.1 Calls	381
	14.7.2 Puts	384
14.8	Stock Options Markets	385
	14.8.1 Strike Prices for Listed Stock Options	386
	14.8.2 Expiration Dates for Listed Stock Options	387
	14.8.3 Market Makers	388
	14.8.4 The Role of the Options Clearing Corporation	389
14.9	Reading Options Prices in the Financial Press	390
14.10	Transaction Costs	391
14.11	Margin	393
14.12	Taxes	395
14.13	Index Options	397
	14.13.1 Index Options Are Cash Settled	397
	14.13.2 Timing Risks	399
14.14	Foreign Exchange Options	400
14.15	Futures Options	401

14.16	Other Options	405
14.17	Summary	405
	References	406
	Notes	406
	Problems	408
15	Options Strategies and Profit Diagrams	411
15.1	Profit Diagrams for Long Stock and Short Stock	411
15.2	Long Calls	413
15.3	Writing a Naked Call	414
15.4	Long Puts	415
15.5	Writing Naked Put	415
15.6	Covered Call Writing	417
15.7	Vertical Spreads	420
	15.7.1 Bullish Vertical Spread with Calls	420
	15.7.2 Bullish Vertical Spread with Puts	421
	15.7.3 Bearish Vertical Spread with Calls	422
	15.7.4 Bearish Vertical Spread with Puts	423
	15.7.5 Other Thoughts on Vertical Spreads	423
15.8	Straddles and Strangles	425
15.9	Synthetic Forward	428
15.10	Other Strategies	430
15.11	Rate-of-Return Diagrams	432
15.12	Profit Diagrams for Different Holding Periods	433
15.13	Several Caveats	434
15.14	Research on Option Strategies	436
15.15	Summary	437
	References	437
	Notes	438
	Problems	439
16	Arbitrage Restrictions on Option Prices	443
16.1	Notation	444
	16.1.1 Time	444
	16.1.2 Interest Rates	444
	16.1.3 Dividends	444
16.2	Pricing Restrictions for Calls	446
	16.2.1 Upper Bound	446
	16.2.2 Lower Bounds	446
	16.2.3 Early Exercise of American Calls	453

16.3	Puts	456
16.3.1	Upper Bounds	456
16.3.2	Lower Bound for Puts on a Non-Dividend-Paying Stock	457
16.3.3	Lower Price Boundaries for Puts on Dividend-Paying Stocks	459
16.3.4	Early Exercise of American Puts	461
16.4	Put-Call Parity	462
16.4.1	European Options; No Dividends	462
16.4.2	European Options on Stocks That Pay Unknown Dividends	464
16.4.3	American Options on Non-Dividend-Paying Stocks	465
16.4.4	American Options on Stocks That Pay Unknown Dividends	467
16.5	Box Spreads Using European Options	469
16.6	Summary	470
	References	470
	Notes	471
	Problems	472
17	The Binomial Option Pricing Model	475
17.1	A Quiz	475
17.2	Deriving the Binomial Option Pricing Model for Calls on Non-Dividend-Paying Stocks	477
17.2.1	Assumptions	477
17.2.2	The Derivation: One-Period Binomial Option Pricing Model	478
17.2.3	Risk Neutrality	481
17.2.4	The Two-Period Binomial Option Pricing Model	482
17.2.5	A Numerical Example of the Two-Period Binomial Option Pricing Model	486
17.2.6	The Multiperiod Binomial Option Pricing Model	489
17.2.7	A Numerical Example of the Multiperiod Binomial Option Pricing Model	491
17.3	Using the Binomial Option Pricing Model to Value Calls on Dividend-Paying Stocks	493
17.3.1	European Calls on Stocks That Pay a Discrete Percentage Dividend	493

17.3.2	European Calls on Stocks Paying a Discrete, Known Dividend Amount	497
17.3.3	American Calls on Stocks Paying a Given Dollar Dividend Amount	499
17.4	Puts	503
17.4.1	Simple Binomial Put Pricing	503
17.4.2	A Numerical Example of Binomial Put Pricing	505
17.5	Portfolio Insurance and Dynamic Trading	509
17.6	Other References on the Binomial Option Pricing Model and Dynamic Trading	513
17.7	Summary	514
	References	514
	Notes	514
	Problems	515
18	Continuous Time Option Pricing Models	521
18.1	The Black–Scholes Option Pricing Model	521
18.1.1	Assumptions Behind the Black–Scholes Option Pricing Model	521
18.1.2	A Quick Discussion of the Importance of Lognormal Returns	522
18.1.3	The Variance of the Stock’s Return Is Proportional to Time	522
18.2	The Black–Scholes Option Pricing Model and a Detailed Numerical Example	523
18.3	An Intuitive Look at the Black–Scholes Option Pricing Model	526
18.4	The Black–Scholes Option Pricing Model and European Put Prices	527
18.5	Two Handy Extensions of the Black–Scholes Option Pricing Model	528
18.5.1	Variant One: The Black–Scholes Option Pricing Model on Securities Paying Known, Discrete Dividends	528
18.5.2	Variant Two: The Black–Scholes Option Pricing Model on Securities Paying a Continuous Dividend Stream	530
18.5.3	European Puts with Known Dividends	531
18.6	The Relationship Between the Binomial Option Pricing Model and the Black–Scholes Option Pricing Model	531

18.7	The Nettlesome Task of Estimating a Security's Volatility, σ	532
18.7.1	Historical Volatility	532
18.7.2	Improving on the Estimate from Historical Data	534
18.7.3	Implied Volatility (IV)	534
18.7.4	Using Implied Volatility Estimates	535
18.7.5	Market Volatility Index (VIX)	536
18.7.6	The Volatility Smile and the Term Structure of Volatility	536
18.8	Generalizing the Black–Scholes Option Pricing Model	539
18.9	Options on Futures Contracts	539
18.9.1	Valuing European Futures Options	540
18.9.2	Valuing American Futures Options	541
18.9.3	Put–Call Parity for Options on Futures Contracts	542
18.9.4	Strategies That Use Options on Futures Contracts	542
18.10	American Call Options	542
18.10.1	Pseudo-American Call Model	543
18.10.2	American Puts	545
18.11	Summary	547
	References	547
	Notes	548
	Problems	550
	<i>Appendix</i> Notes on Continuous Compounding and Stock Return Distributions	553
19	Using Options for Risk Management	563
19.1	The Greeks	565
19.1.1	The Greeks for Black–Scholes Calls (a.k.a. “No-Name,” Theta, Rho, Vega, Delta, and Gamma)	565
19.1.2	The Greeks for Black–Scholes Option Pricing Model: Puts	569
19.2	The Importance of Delta	570
19.2.1	What Is Delta?	570
19.2.2	What Is Gamma?	572
19.3	Riskless Hedging	573
19.4	Position Deltas and Gammas	579
19.4.1	Position Deltas	579
19.4.2	Position Gammas	580
19.4.3	Generalized Portfolio Sensitivities	582
19.4.4	Time Spreads	585

19.5	Caps, Floors, and Collars: Using Options to Manage Interest Rate Risk	588
19.5.1	Caps	588
19.5.2	Floors	590
19.5.3	Collars	590
19.5.4	Valuing Caps, Floors, and Collars	591
19.6	Summary	593
	References	597
	Notes	597
	Problems	598

PART 5 DERIVATIVE FRONTIERS 603

20 Current Topics in Risk Management 605

20.1	Value at Risk (VaR)	605
20.1.1	Background	605
20.1.2	The VaR Concept	606
20.1.3	Computing VaR	606
20.1.4	Stress Testing	610
20.1.5	Back Testing	613
20.1.6	Which VaR Calculation Is Best?	613
20.2	Credit Derivatives and Options on Debt Instruments	613
20.2.1	Credit Derivatives Background	613
20.2.2	Two Major Types of Credit Derivative	614
20.2.3	Other “Event” Derivatives	615
20.2.4	Options on Debt Instruments and Interest Rate Options	616
20.2.5	Options on Swaps	619
20.3	Exotic Options	622
20.3.1	Free-Range Exotic Options	622
20.3.2	Path-Dependent Options	626
20.3.3	Shouts and Ladders	629
20.4	Summary	630
	References	631
	Notes	632
	Problems	634
