**Third Semester M.Tech. Degree Examination, Dec.2014/Jan.2015**  
**Information Security**

Time: 3 hrs.

Max. Marks:100

Note: Answer any FIVE full questions.

1. a. What is security? What are the critical characteristics of information? (08 Marks)  
b. Explain in brief the different phases of security systems development life cycle. (06 Marks)  
c. Explain the relationship between the policies, standards and practices. Give the block diagram for the same. (06 Marks)
2. a. Describe the issue specific security policies and system specific security policies defined by the management of the organization. (10 Marks)  
b. Define firewall? How are the firewall categorized based on processing mode? (10 Marks)
3. a. Explain the different detection methods used by intrusion detection and prevention systems to monitor and evaluate network traffic. (10 Marks)  
b. What are honey pots, honey nets and padded cells? List the advantages and disadvantages of using them. (10 Marks)
4. a. What are passive and active attacks? Discuss different types of passive and active attacks. (08 Marks)  
b. Name the organizations under the internet society that are responsible for the work of standards development and publications. (06 Marks)  
c. Summarize the various types of cryptographic attacks based on the amount of information known to the cryptanalyst. (06 Marks)
5. a. With a neat diagram give an overview of the AES algorithm. Explain. (10 Marks)  
b. Explain message digest generation using SHA – 512. Draw a block diagram for the same. (10 Marks)
6. a. List the requirements of public key cryptography. (06 Marks)  
b. Perform the encryption and decryption using the RSA algorithm for the following :  
 $P = 3, q = 11, e = 7, M = 5$ . (08 Marks)  
c. Explain the Diffie – Hellman key exchange algorithm. (06 Marks)
7. a. List the differences between Kerberos version 4 and version 5. (10 Marks)  
b. Describe with a block diagram, the PGP message generation from user A to user B. (10 Marks)
8. a. What are the functionalities provided by AH and ESP in transport and tunnel mode? (06 Marks)  
b. Explain the anti – replay service provided by AH. (06 Marks)  
c. Explain the generation of dual signature of secure electronic transaction. (08 Marks)

\*\*\*\*\*

Important Note : 1. On completing your answers, compulsorily draw diagonal cross lines on the remaining blank pages.  
2. Any revealing of identification, appeal to evaluator and /or equations written eg, 42+8 = 50, will be treated as malpractice.
